JANUARY, 1975

AUBURN, ALABAMA

As Education Dean—

Pierce to Step Down

Dean Truman M. Pierce, who began his career as a social science teacher in a Georgia high school, announced January 9 that he is relinquishing the deanship of the School of Education at Auburn University to devote full time to a program "which I consider to be the most promising development in education since I've been in the field." Dr. Pierce, in a meeting with the School of Education faculty, said that he will relinquish the deanship Sept. 1 after 20 years in the job.

"Our program for improving teacher education has reached the point that I want to devote full time to it," Dean Pierce said. "I believe that working on this program is the most important thing I can do professionally, and I have asked that I be given the opportunity to spend my full time in that effort."

"Dean Pierce has made important contributions to Auburn University and to education in his career," said Auburn President Harry M. Philpott. "I want to emphasize that we are not losing Dean Pierce. He will continue to be a valuable member of the Auburn faculty. We will miss his leadership as dean of the school, but we will continue to receive that leadership in the program to better prepare Alabama teachers."

Dr. Philpott said that a screening committee is being chosen at the present time to recommend a successor to Dean Pierce.

"The program in teacher upgrading has developed to the point that models for the evaluation of teacher competence must be devised, with the development of a certification plan based on the models," Dean Pierce said.

"For the past 2 1/2 years we have been orienting our prospective teachers in the direction of performance-based models, defining more clearly the job the graduate is to do in schools and the competence, knowledge, and attitudes necessary to succeed. Now we must develop the models to evaluate teacher competence and let those be reflected in the teacher certification. We have made great progress in this program. Our faculty has done a magnificent job; Auburn is closer than anyone to developing these models, and I want to be a part of getting that job done."

Dean Pierce said that he expects

to be working with the State Department of Education on evaluation and certification as they relate to Auburn graduates.

"There are many facets of this program—field work, work with the state department, work with the consortium of 10 school districts in the Auburn area, work with our own people—which must be brought together," Dean Pierce said.

Dean Pierce was director of the Southern States Cooperative Program in Educational Administration (SSCP) at George Peabody College for Teachers at Nashville when he was selected as the second dean of Auburn's School of Education in 1955. He succeeded the late Zebulon Judd, who has served 41 years as head of the education department and dean of the school.

He cites among highlights of his career the work at the SSCP in identifying the competence needed by successful school administrators and developing programs for attainment of that competence; his research into community power structures and how community decisions are made; and a study of the differences in the dual school systems prevalent in the region at that time.

"One of the best lessons I ever learned was in the years of research on community power structures," Dean Pierce said. "I learned that there is a self-correcting mechanism in our society, and that leaders discover they cannot deviate far from the accepted norms of the community and still be leaders. I believe that most leaders have an instinctive feeling for this."

Born and reared at Equality, Ala., Dean Pierce received his Ph.B. from Piedmont College; his M.A. from the University of Alabama; and his Ph.D. from Columbia University.

Following one year as a teacher at Martha Berry School in Georgia, Dean Pierce held positions in Autaugaaville, DeKalb County, Cherokee County, and Tallassee school districts. He followed that experience with two years as a

BUSINESS COUNCIL—The School of Business Advisory Council at Auburn University met recently and elected Sam (Bo) Renfroe Jr., '49 (seated left) of Renfroe Construction Co. in Fayette chairman to succeed Ed Powers '36 (seated

right) of Haskins & Sells in Birmingham. New members of the Council are (standing from left) Frank Plummer, chairman of First Alabama Bankshares in Montgomery, and Ed England, president of Vulcan Materials in Birmingham.

research assistant and instructor at Columbia University; one year as head of the education department and director of field service and dean of the Troy State Teachers College; and three years as associate professor and professor of education at the University of Tennessee at Knoxville before becoming director of SSCP at George Peabody College.

Dean Pierce was a founder and early president of the University Council for Educational Administration; a founder and early president of the Association of Deans of Education of State Universities and Land-Grant Colleges; and president of the Alabama Association of Colleges of Teacher Education. He has served as director of regional, state and

district school surveys, and as a consultant to state and local school systems, institutions of higher education, and various agencies and groups interested in education. Numerous honors, awards and offices have been bestowed on Dean Pierce.

His publications include *Public School Administration*, a widely used textbook co-authored with G.L. Grider and Forbus Jordan; *White and Negro Schools in the South*; *Community Leadership for Public Education*; *Federal, State and Local Government in Education*, and numerous other articles for research and professional journals.

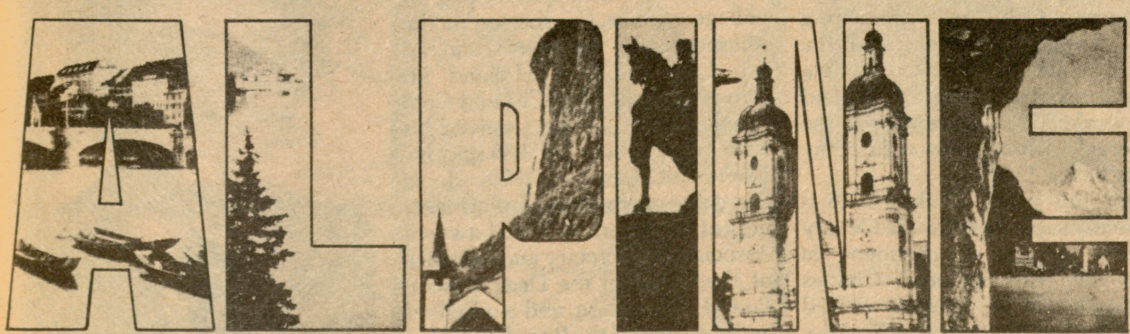

Truman M. Pierce

Auburn Senior Rhodes Finalist

An Auburn senior in biology came that close to winning one of 32 prestigious Rhodes Scholarships, only to lose out to a high school friend from down the street who goes to Harvard. Edgar Gentle, III, was one of two Alabamians to reach the semifinals of the Rhodes Scholarship District Competition in New Orleans. The competitors came from Mississippi, Louisiana, Texas, Arkansas, and Oklahoma, and four Rhodes scholars were chosen.

Since 1971 Edgar has been so busy with interests in ecological, geological and archeological activities that one can scarcely believe that he has had time to do the scholarship that has earned him recognition for scholarship as the Outstanding Freshman in the School of Agriculture by both Phi Kappa Phi and the Danforth Leadership Scholarship, as Gamma Sigma Delta Sophomore Achievement Scholarship and the Gamma Sigma Delta Junior Achievement Scholarship. He is active in about every conservation group state and nationwide, has been a Red Cross Volunteer in his home town of Bir-

ADVENTURE

WITH THE AUBURN ALUMNI ASSOCIATION

JUNE 7-15, 1975

For Information, See Page 3

(Continued on page 2)

NOBEL WINNER SPEAKS—Dr. Gerhard Herzberg, at right, Nobel Laureate in Chemistry, addressed a joint Chemistry-Physics Colloquium at Auburn in December. Dr. Herzberg, who has published profusely and who has been awarded many honors and honorary degrees for his success

in making nature less mysterious, is currently Distinguished Research Scientist with the National Research Council of Canada. At left, Dr. Howard Carr '36, head professor of Physics, and Dr. Charles Colburn, head professor of Chemistry.

Started by Alumni Family—

Scholarship Fund to Honor Dr. Allison

The sons and daughters of the late Mr. and Mrs. George B. Ward, Sr., who grew up near to the family of Dr. Fred Allison on West Magnolia Ave. in Auburn have started the Dr. Fred Allison Scholarship Fund. The Wards' gifts to the Fund are in memory of their younger brother William R. Ward. They have established the Fund "to

be used for deserving students who desire to pursue a study of physics with the hope that one of these students might be able to equal the

achievements of the late Dr. Fred Allison in the world of physics in which he became nationally known, wrote many articles, and delivered many papers."

Cullen M. Ward '46 informed *The Alumnews* that the idea of beginning the Allison Fund developed as a result of an *Alumnews* article "Fred Allison: He was at home in the World" and the number of letters to the editor which have appeared in *The Alumnews* following Dr. Allison's death in August.

The Wards believe that the scholarship fund is a worthy cause for Auburn alumni and hope others will join them by making a contribution to the Allison Fund, no matter how large or small. Contributions may be sent to the Auburn Alumni Association, Auburn, Ala. 36830, and designated for the Allison Scholarship Fund.

The originators of the Fund are: George B. Ward, Jr., '33 who graduated from Auburn and Yale and later attended Oxford University in England. He is currently a businessman in Seattle, Wash.

Nell R. Ward who now lives in Cupertino, Calif. After graduating from Auburn she served with the Army in the Medical Corps as a dietitian in the South Pacific and has worked as a dietitian with the Veteran's Administration in many parts of the U.S.

Dorothy Ward Blackwell '38 is currently supervisor for the County Family Service Department in Abbeville. Her husband, Charles G. Blackwell '41, recently retired from the Soil Conservation Service.

Rebecca Ward Cooper now lives in Lompoc, Calif., with her husband Ret. Col. John DeWitt Cooper '48, who has served with

NATIONALLY RECOGNIZED—Bobbie Walden of Montgomery has received the Lyndon Baines Johnson Memorial Award as the Graduate Student of the Year in Adult Education, presented by the National Association of Adult Educators. Mrs. Walden, who juggles the roles of wife, mother, student, and teacher, was chosen from representatives of 59 colleges and universities with graduate programs in adult education.

Girls Beat Boys—

45 Graduate With Honors

Forty-five honor graduates appeared on the graduating list of Auburn's fall commencement. Included were 7 students graduating *with highest honor*, 13 *with high honor*, and 25 *with honor*—with the girls outnumbering the boys in every category.

With Highest Honor

Those graduating *with highest honor* were: Kathy Ann Suhorsky Bartlett of Baltimore, Md., B.A. in journalism; Katherine Hope Latvala of Albany, Ga., B.A. in French; Wanda Prather of Auburn, B.S. in mathematics; Carol Ann Spinks of Thomasville, B.S. in law enforcement; Nancy Marie McCorquodale of Jackson, B.S. in education; Mark Gordon Scheirer of Scenery Hill, Pa., Bachelor of Industrial Engineering, and David Alan Wallace of Headland, B.A. in English.

With High Honor

High honor graduates included: James Floyd Duke of Huntsville, B.S. in zoology; Russell Henry Everett of Roanoke, Bachelor of Fine Arts; James Earl Brown, Jr., of Springfield, Va., B.A. in psychology; Mary Kathryn Hodgkins of Auburn, B.A. in sociology; William Dendon Grisham of Lawrenceburg, Tenn., B.S. in biological science; Steven Henry Barry of Childersburg, B.S. in business administration; Judy Marie Blakey of Midland City, B.S. in education; Vanessa Ann Burton of Tallassee, B.S. in education; Ivey Harrison King of Griffin, Ga., B.S. in education; Mary Kae Lankford Jehle of Jackson, Miss., B.S. in education; Deborah Lynn Acker Mitchell of Birmingham, B.S. in education; Billie Jane Turner Williams of Montgomery, B.S. in education; Bruce Edward McKinney of Birmingham, Bachelor of Chemical Engineering.

With Honor

Graduating *with honor* were: Pamela Anne MacAfee Spencer of Warner Robins, Ga., B.A. in sociology; Wayne Gray Dupree of Deatsville, B.S. in zoology; James Walker Petranka of Montgomery, B.S. in wildlife management; Donna Jo Chamblee of Blountsville, B.A. in psychology; Mary Ernestine Dunn of Columbus, Ga., B.A. in political science; Nancy Grace Smith Gober of Springville, B.A. in psychology; Janice Darlene Rice Grubbs of Lanett, B.A. in psychology; Rita Joy DeMonia of Cullman, B.S. in law enforcement; James Larry Duncan of St. Simons

Island, Ga., B.S. in mathematics; Deborah Kay Wine Maddox of Fruitdale, B.S. in laboratory technology; Thomas Oliver Kitchens of Alexander City, B.S. in business administration; Joy Mallory of Thomaston, Ga., B.S. in business administration; Hilda Ann McNeer of Smiths, B.S. in business administration; Pamela Susanne Bryant of Dothan, B.S. in education; Dorothy Virginia Goodall of Gadsden, B.S. in education; Betty Jean Brown Shell of Auburn, B.S. in education; Sharon Reed Greer Smith of Decatur, B.S. in education; Carolyn Ellen Williams of Birmingham, B.S. in education; Abigail Fincannon York of Montgomery, B.S. in education; James Bruzell Hogg of Dozier, Bachelor of Civil Engineering; William Allen Braswell of Eufaula, Bachelor of Electrical Engineering; Bruce Edward Imsand of Mobile, Bachelor of Electrical Engineering; Charlie Rodney Pearce of Anniston, Bachelor of Electrical Engineering; Francis Joseph Smith of Butler, Bachelor of Electrical Engineering; Gary Lynn West of Bowling Green, Ky., Bachelor of Electrical Engineering.

Rhodes Finalist

(Continued from page 1)

mingham, a volunteer worker in the archeological excavation of Fort Toulouse (a French Outpost built on the Alabama river in the 1700's), and has spent his summers working as 1. a conservation aide with the U.S. Forest Service; 2. a biological aide with the Department of the Interior in the Bureau of Sport Fisheries and Wildlife in Panama City, Fla.; 3. a park ranger in the Shenandoah National Park in Virginia, and 4. as a conservation trainee at the Marion State Fish Hatchery with the Alabama Department of Conservation and Natural Resources.

He had hoped to read for a Doctor of Philosophy in ecosystems dynamics as a Rhodes scholar, but since he missed that chance, Edgar says he will probably accept a fellowship for doctoral work in ecological zoology at the National University of Australia in Canberra.

Edgar is the son of Mr. and Mrs. Edgar Gentle, Jr., '42.

Edgar Gentle, III

the Air Force all over the world.

Cullen M. Ward '46 graduated from Auburn after interrupting his college studies for service in the Marines under the supervision of the Late Lt. Gen. Holland M. (Howing Mad) Smith '01 and Gen. Franklin Hart '15. He received his LLB from Emory in 1948 and his Doctor of Laws in 1970. He is currently on the Board of Governors of the American Trial Lawyers Association, secretary and member of the Board of the Dean Roscoe Pound Foundation, and is a Fellow and member of the Board of the International Academy of Trial Lawyers. He, his wife, and two daughters (one of whom is a junior at Auburn) live in Atlanta.

Alumni Tour to Switzerland

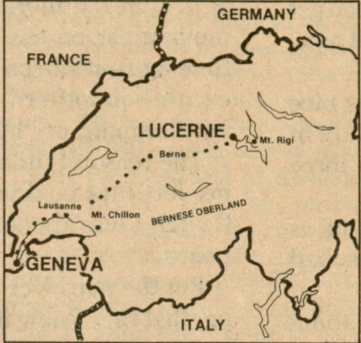

Last June when some 150 Auburn Alumni returned from the first Annual Auburn Alumni Association tour, they were asked where they would like to go this year and the choice was Switzerland. So the Alumni Association is offering an Alpine Adventure for Auburn Alumni and their families June 7-15, 1975.

The leisurely visit will include three days in Geneva and four in Lucerne, with a drive between the two towns through the famed Swiss countryside with a stop in Berne.

The round-trip eight-day tour, beginning and ending in Atlanta, Ga., is priced at \$728 per person double occupancy (single is an extra \$70.00) including continental breakfast each day, special party

and cruise on Lake Geneva, tips and taxes, and many other extras.

For further information write the Alumni Association for a special brochure or if you have already decided to join us (and space is limited) just mail us the reservation request form below and confirmation deposit of \$200.00 per person.

Class of 1924 Honors Faculty

During the anniversary of their 50th year since graduation from Auburn, the members of the Class of 1924 on campus for their reunion decided to present a resolution to President Harry M. Philpott honoring the University faculty.

The body of the resolution submitted to President Philpott by W. Kelly Mosley, chairman of the Resolutions Committee for the Fiftieth Anniversary reads:

Whereas the exceptional character and spirit of Auburn University are widely known and admired; and

Whereas the continuing reputation of an institution depends on the quality of its human resources; and

Whereas the Faculty of the University have, for over a century, exhibited a commitment to teaching and scholarly inquiry, and have, through the integrity of their personal conduct, influenced the lives of countless Auburn students;

Now therefore let it be resolved, that the members of the Class of 1924, as they celebrate their fiftieth anniversary and remember their own college years at Auburn, recognize the distinctive contributions made by the faculty to the life of the University, and hereby affirm their confidence that the Faculty will sustain in the years ahead this great tradition of scholarship and dedicated teaching.

HONOR FACULTY—Kelly Mosley '24 left, presented a resolution from the Class of 1924 to President Harry M. Philpott honoring the Auburn faculty. The Class of '24 decided to present the resolution during their visit to campus for their 50th reunion.

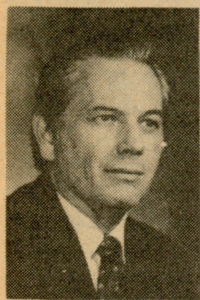

TO GUIDE RESEARCH—An executive committee has been appointed to establish and administer the objectives of the Scott-Ritchey Research Program for small animals, recently approved by President Harry M. Philpott. These members are (seated from left) Dean James Greene '33, chairman; Dr. B.F. Hoerlein, director and executive secretary; (standing from left) Dr. N.B. King, vice chairman;

Dr. S. Steven Swaim, '71 assistant director; Dr. I.T. Omtvedt, member. The research program, originally started by Mr. K.A. Scott, was given recent impetus by the multi-million bequest of Miss Eleanor Ritchey from which Auburn is now receiving funds. Some 13 neurological research projects are currently underway with 13 additional ones to be added over the next 2 years.

An Overdue Tribute

By Jerry Roden, Jr., '46

Roden

Men speed on the silver wings of superjets, but time flees more swiftly down the path of the golden sun, and that which men would do often remains undone because we reckon ill the flight of time. Almost eighteen years ago, I began writing columns as *Alumnews* editor, and almost ten years ago I resigned the editorship and have not been on the payroll of the Alumni Association since.

Yet, right or wrong, I have continued to write for *The Alumnews* editorial page, primarily because I wish to retain a sense of identity with the monumental effort that the Auburn Alumni Association is making on behalf of quality education. This statement may startle many who think of the Alumni Association as an adjunct to the Athletic Department. Space does not permit, would not permit even if I were allocated this whole issue, adequate detailed support to make clear the role the Alumni Association has played in Auburn University's solid progress.

One could devote pages to the Association's legislative programs of the past, to its Engineering Emergency Fund drive, to its Auburn University Development Campaign, and to the various subsequent activities of Auburn University Foundation. Other pages could go to praise the leadership of such volunteers as Roy B. Sewell, Al Biggio, Ben Gilmer, Kelly Mosley, Gilmer Blackburn, and the late Edmund C. Leach, Frank Samford, Sr., and Paul Haley—to name a few on a star-studded roster.

If I had all those pages and the ability to bring all the outstanding volunteers and programs of the Alumni Association into dramatic focus, I still would not have done that which has remained undone since I left the staff of the Alumni Association and it thus became proper for me to speak out plainly. For nothing that alumni volunteers have done alone or in concert with University administrators could have reached the most desirable fruition without the efforts of one man who is known by many but adequately appreciated for what he is by far too few.

A few weeks before I became *Alumnews* editor, Joseph B. Sarver, Jr., requested that I come in for an interview for the job. I did not think that I was interested because I then thought of the Association primarily as an adjunct to the Athletic Department. And, even though I knew that Coach Ralph Jordan was a gentleman devoted to the whole University and not to football glory for its own sake, my interests lay elsewhere.

Joe Sarver did not need much time to disabuse me of my naivete: at that time he had a long-range development plan that included in broad outline every program for improving education—including the establishment of Auburn University Foundation—that the Alumni Association has since executed. He convinced me, I took the job, and have never regretted it.

During my years with the Alumni Association first as editor and then as volunteer writer, my appreciation of Joseph B. Sarver, Jr., executive secretary of the Auburn Alumni Association, has grown steadily. In the midst of pressure from University administrators on the one hand and alumni irate about such trivial matters as the location of their football tickets on the other, he has never lost sight of his primary goal: the support of Auburn University as a center of learning.

In everything—professional activities and personal life—Joseph B. Sarver, Jr., is a gentleman of the old school: a thoughtful, philosophical conservative whose word is his bond. As a conservative, he does not vacillate with the winds of change, but he does not possess a closed mind. He will alter his position in the face of evidence indicating both the propriety and desirability of doing so, but will not budge an inch on

Looking at the World at 4 A.M.

By Bob Sanders '52

(Reprinted from the Auburn Bulletin)

A friend of mine recently had a temporary extra job that required extra-early rising in the morning. He was complaining about it.

"But," I said, "after you do finally make that terribly big step of actually getting out of the bed, and then get the face washed and the clothes on, isn't it kind of nice, being up at that time of the day?"

"Nope," he said, "Not to me. There's nothing nice about it. I'm just not an early morning person and I'm not really aware of what's going on for two or three hours after that ridiculous time I get up."

Another friend was complaining the other night, as he was breaking up the party, that, after all, he had been up since 4:45 that morning.

I asked him if he didn't feel a little bit guilty about sleeping half the morning away like that. I told him that I got up before that five mornings a week.

He looked at me pityingly.

I don't, however, feel any special need for pity. You can apparently get used to nearly anything. I have been getting up in the wee hours for several years now, and except for that initial agonizing, wrenching experience of turning back the covers and getting the feet on the floor, early rising is not bad at all.

Among the relatively few of us who are called upon to get up long before the sun does, there is a feeling of common commiseration, to be sure, but also a certain sense of possession, a slightly jealous feeling that this special time of the day is ours, by George, a time that very few outsiders ever experience.

Let them sleep. They couldn't possibly appreciate the quiet joy of sipping coffee—which tastes better than at any other time of the day—and watching the old planet, or our little part of it, wake up.

I can remember some train trips of long ago. To anybody who happened to rouse up enough to notice, there seemed to be an unmatched coziness about the cabins alongside the tracks where the lights were on early, early. The smoke would be curling from their chimneys. I could almost see through the walls I imagined, and see the families around the little breakfast tables, fairly close to the old cookstoves. . . The little squares of light here and there warmed the whole sleeping countryside.

Here, there'll be a few cars around the all-night diner, mostly hunters, probably; or maybe some students who have been studying all night. The newspaper distributors will be servicing their vending machines with new loads of the day's papers.

The milkman will be delivering. Prowl cars will be prowling. They don't have much to do, usually, so an early morning driver may sometimes be stopped for a triviality that would not be noticed if police were busier.

For instance, I have been stopped for not coming to an absolute, dead, quivering stop at an intersection, when it was perfectly clear that no car, man or beast

the basis of mere expediency, no matter what the cost to his personal peace and welfare.

During the years my observation as student and faculty and staff member, Auburn has made long strides toward the eminence that a genuine university attains. Many people deserve credit for Auburn's achievements during this time and for the promise of greater attainments to come. When some future historian chronicles Auburn's upward course, he will perform poorly if he fails to dig deep enough to discover how much more Joe Sarver has done than many who have basked in the glory of the floodlights.

P.S. Joe does not know that I have written this column; Editor Kaye Lovvorn has conspired to keep it secret until the issue is out. We may both wish we hadn't done it by the time he finishes rebuking us for the liberty we have taken.

was coming down my side of the road between here and Beauregard.

I was stopped one time, also, for committing the dastardly crime of turning left at Toomer's Corner—at 4:45 in the morning, when there was not another moving car on any street in town; and once, a long time ago—it's been a long time since I could use this excuse—just after I had purchased a new vehicle, for not dimming my lights.

The reason I didn't was because, for the life of me, my left foot couldn't find the dimmer switch, even though I was about to stomp a hole through the floor-board.

But the cops were always nice about it, always saying that they knew it was early in the morning and all, but to please be a little more careful in the future. And I realized that, for them, it wasn't a new and potentially wonderful new day, but the tailend of a long, long one, and that they were trying to hang on, to fill the hours with something, till quitting time.

To those of us who have been up and working for a couple of hours, there is a smug amusement in watching the sluggards who are just crawling up at 6:30 or seven as they try to get their brains and bodies in gear for another go at it.

They probably don't even appreciate getting to sleep that late. A few mornings of early getting up would enrich their lives and add a whole new meaning to that innerspring mattress.

I can, for example, appreciate a few extra hours in the sack Saturdays and Sundays in a way you wouldn't believe. When that mental alarm goes off, and then the subsequent realization that I don't have to get up that day, after all, you wouldn't believe how appreciative a body can be.

But, it's still nice, come Monday morning, to be up before the masses, when it's just us, the early few, in our own little early world. It's pretty esoteric stuff. You probably wouldn't like it. Go on back to sleep. Nite nite.

Behind The Headlines—

Writers & Subjects

By Kaye Lovvorn '64

Bob Sanders '52, may not have been properly introduced to his *Alumnews* readers, and hence they may be confused about his early morning rising. Bob officially wakes up the town every morning and has for years from his post at radio station WAUD.

Ever now and then we get back to students and what they're like these days. In this issue we give you a chance to meet Miss Auburn Virginia Martin, SGA President John Wiley, and AWS President Glenda Earwood.

THE AUBURN ALUMNEWS

ONLY YESTERDAY—

Alumni Were Raising Money for Gym

By David Williams '74

Sixty Years Ago: The Tiger basketball squad worked out daily with four complete teams battling it out for starting positions. Captain Clements, in charge of the work outs, saw promise in centers,

Watkins and Forbes; guards, Hudson, Louisell, J.B. Liles, Carter; and forwards, himself, Payne, and Floyd. "Irish" Mike Donahue, who had recently affixed his signature to a five year contract, offered instruction to the Tiger cagers.

A five-man team of students from the Alabama Polytechnic Institute won first place in a judging contest at the Tri-State Fair in Memphis, Tenn., for judging cattle.

The *Alumnus* reported that at a recent meeting of the State Highway Commission Auburn men were recognized leaders in the important state work. R. Platt Boyd '05 stepped down as president of the Commission and was replaced by Prof. G.N. Mitcham '97.

Governor O'Neal announced the appointment of T.D. Samford '88 of Montgomery and Charles McDowdell of Eufaula as members of the Board of Trustees of Auburn. They succeeded Harry L. Martin '08 of Ozark and Reid Barnes of Opelika.

The *Alumnus* quoted several Alumni as they sent along their contributions to the Gymnasium Fund. J.E. Moses wrote, "Enclosed find check for \$25.00 as promised toward the Gymnasium Fund. Pardon delay as it was on account of the War." Wallace P. Pruitt '03 wrote, "Have been a little tardy in sending in my check, due to the fact that court has been in session. However, I am glad to enclose my check with this letter and trust that the gymnasium can be rushed to an early completion."

Fifty Years Ago: The donation of the broadcasting station WSY by the Alabama Power Company swept across the *Plainsman* front page. The donation to Alabama Polytechnic Institute made it possible for Auburn to have one of the most powerful and complete stations in America. Mr. Victor H. Hanson, trustee of API and publisher of the *Birmingham News*, officially offered the set to the college as a gift of the Power Company. The radio department of the college under the supervision of Prof. Arthur St. Charles Dunston and headed by Mr. Malcom Wilder was one of the most progressive of its kind.

The Junior Prom featured Mr. Harold Oxley and his Cinderella Roof Garden Orchestra and the *Plainsman* called on "those who trip the fantastic toe" to enjoy the best music since the advent of the

Minneapolis Symphony Orchestra this past year.

A pen of ten White Leghorn hens owned by F.A. Rew of Carrollton held first place at the end of the ninth week of the national egg laying contest according to John E. Ivey, head of the poultry department. The ten hens belonging to Rew laid 340 eggs in nine weeks.

Fees for a resident of Alabama were \$52.00 for the second semester. Students in Pharmacy (except freshman in the four year course) paid an additional \$10 and students in Veterinary medicine paid an additional fee of \$5 each semester.

Forty Years Ago: Miss Netty Murphey, called a popular co-ed by the *Plainsman*, led the Grand March for the mid-term dances with Bill McTyeire. Miss Murphey was also winner of the "Miss Auburn" contest. Over 200 visiting girls were in the city for the mid-term dances to hear Kay Kyser and Black Hawk Cafe Orchestra.

Registration stood at 1,658 and was going for an all time high of 1,775, a feat not accomplished since the second semester of 1931-32.

Joe Bob Mitchell, Hugh Rodgers, and Joel Eaves were the three sophomore mainstays on the Jordan-coached Tiger cage team and with approximately 80 prospective gridmen on hand, Coach Jack Meagher began the annual spring training period at the Plains.

Thirty-Five Years Ago: Vanderbilt tripped up the Plainsmen 51 to 45 in a heated basketball contest. Hurting the Tigers as much as anything else was the lack of reserves. Coach "Shug" Jordan made only two substitutions while Vandy made five. The Tigers moved on to Sewanee where they met ex-Tiger Joel Eaves' team. Rumors circulated among sportswriters that Basketball Coach Jordan was slated to take over the recently vacated head coach's position at Sewanee.

Neil Davis '35, publisher of the *Lee County Bulletin* and former *Plainsman* editor led a discussion on Editorial Problems at the meeting of the Alabama Press Association in Birmingham. It was the largest meeting ever with more than a hundred papers represented. The representatives were also special guests of the Symphony of the South broadcast.

Eddy Duchin called from Charlotte, N.C., to say his plane was down and that he would be late for the afternoon tea dance at Auburn. Duchin and his orchestra made the rescheduled tea dance at five o'clock.

Thirty Years Ago: After taking part in four invasions, Capt. Ralph "Shug" Jordan was back in Auburn for a couple of days. The popular former assistant Auburn basketball coach arrived in the United States Dec. 30 after an absence of two and a half years. Capt. Jordan, a member of the First Engineer Special Brigade amphibian outfit left this country August 1942. He participated in the invasion of North Africa with the Fifth Army, the invasion of Sicily and Italy with the Fifth and Seventh Armies, and the invasion of France with the First Army.

Capt. Jordan reported for duty at Ft. Lewis, Wash., following his stay in Auburn. While at the Plains, Capt. and Mrs. Jordan were guests of Mr. and Mrs. Wilbur Hutsell.

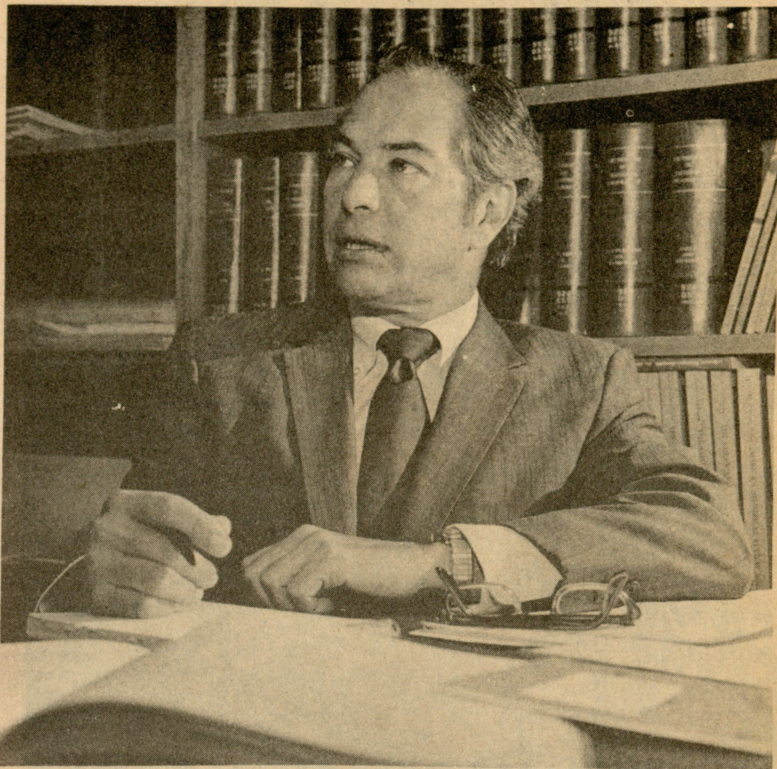

Everyone was stopping in Alumni Hall just to pull the bell. The bell, originally for calling cows the *Plainsman* said, was attached to a string and when one of the Alumni Hall girls had a caller it was the custom to ring the bell—once for a girl on the second floor and twice for a third floor girl. Folks just couldn't keep from ringing it so over the holidays it was replaced with a buzzer system. According to the *Plainsman*, "Alumni Hall frosh were feeling very 'buzzy' then."

Twenty-Five Years Ago: A complete remodeling of the interior of Langdon Hall was in progress. A new asphalt tile floor replaced the worn wooden one and an acoustical tile ceiling was installed. New drapes and a central heating system completed the major renovations.

The proposed plan for an education building (Thach Hall) called for the building's location to be on North Thach Street between the Alabama Polytechnic Institute serum plant and the new classroom building (Tichenor Hall).

Auburn's 1950 wrestling team, out for its third win of the season against Georgia Tech, consisted of John McGill, Sonny Dragoin, Rick Belfonti, John McKenzie, Robin Baker, Robert Long, Dan Mantrone, Jimmy Bottoms, and John Brnilovich.

Travis Tidwell indicated he would play professional football—postponing his coaching career, if

NEW BOOK FROM 1770—Dr. Robert Rea, professor of history at Auburn, has added to a book published in the Florida Bicentennial Facsimile Series. Dr. Rea has written an introduction and history of Lieutenant Philip Pittman, which is incorporated in the facsimile of Pittman's observations published in 1770.

Rea Active in Facsimile Series

A facsimile edition of a book representing the first British look at the Mississippi Valley, originally published in 1770, is the result of the work of Auburn History Professor Dr. Robert R. Rea. Dr. Rea, in a long introduction to *The Present State of the European Settlement on the Mississippi*, chronicles the life of the author Lt. Philip Pittman from the 15th regiment of the British Army attached to the 34th regiment as a surveyor.

The Present State facsimile is one of 25 18th century facsimiles to be published in the University of Florida Bicentennial Floridian Facsimile Series.

Dr. Rea says that the lieutenant's observations "range from Mobile to New Orleans to Fort Chartres in Illinois, and deal with the attempted revolution against the Spanish on the part of the French." Dr. Rea's introduction is the first account of Pittman's life. He was involved in other surveying activities and mapped French posts, describing them in detail. After involvement in a court martial in Pensacola, Pittman resigned his commission and went to work on *The Present State*. After completing his book, he took a commission with the East India Company. He died in India.

A specialist in English history during the period of the American Revolution, Dr. Rea feels that the Colonial period has been largely neglected in the Southeast and he is trying to bring a change. In addition to his work on the Pittman book, he is one of the authors in the Pensacola Series, another series commemorating the America Revolution Bicentennial. His *Pensacola Under the British*, a social study, has been published.

Dr. Rea is also the author of "Lt.

Col. James Robertson's Mission to the Floridas—1763" in the latest *Florida Historical Quarterly*. The article considers the acquisitions of the English after the Seven Year's War.

Dr. Rea, who has been on the Auburn faculty since 1950, is the author or co-author of several books and many articles on English history. He recently returned from a six-month sabbatical in England.

Letter to Editor

Dear *Alumnus*

My husband and I both hate to see the demise of the "Calendar Girl" photos. The first thing we look for is the picture of the current look on campus—it is our way of keeping in touch with the younger set, a soft memory of our own relatively carefree (before marriage) days at Auburn. Isn't there some way space can be found to continue sharing the "loveliest of the Plains" with us alumni? We were also very pleased to see the Ms. replaced by the Miss in the last issue. It was sort of sad to have such youthful pictures labeled with the Ms. tag. I guess we are only two of many who think the same way about a tradition.

Do you want a way to save money? Send only one copy to couples like us—we've been getting 2 ever since we graduated. It will save some.

Mr. and Mrs. J. T. Sheddan, Jr. '68
(Nancy Collier '67)

he got a satisfactory offer from the team that won draft rights to him—the New York Giants. Tidwell earlier that January indicated he would pass up pro football for coaching and broadcasting.

A lost item in the *Plainsman* classified ad section was an antique wallet with a picture of Betty Grable, 2 one-cent stamps, \$238.16 in confederate money, and two tickets to Bustin' Loose. No reward was offered and—it was only yesterday.

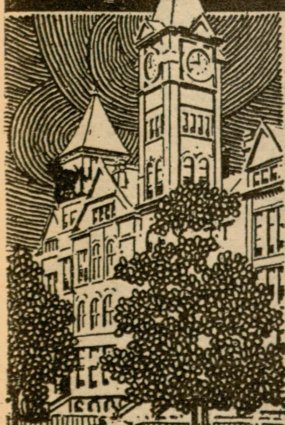

New Lab Manual

A new laboratory manual for physical science courses, prepared by members of the Auburn University physics staff, has been published recently by Publishers of Atlanta.

The manual, *Physical Science*, was developed over several years by Dr. Marlin L. Simon and Dr. Charlotte R. Ward of the Auburn Physics Department and Michael Thompson of the Francis Marion College Physics Department. Mr. Thompson received his M.S. at Auburn this summer.

The lab book was used successfully in a preliminary edition at Auburn last year, and is expected to receive wide usage in both senior institutions and junior colleges.

ALABAMA POLYTECHNIC "AUBURN"

THE Oldest School of Technology in the South. 64 Professors and Instructors. 737 students. 20 well equipped Laboratories. Next session begins Wednesday, Sept. 6, 1911.

New Buildings: Smith Dining Hall, Carnegie Library, Agricultural Hall, Broun Engineering Hall, Dairy and Horticultural Laboratories and Greenhouses.

Departments: I. College of Engineering and Mines—Civil, Electrical, Mechanical and Mining Engineering, Architecture, Mechanic Arts, Technical Drawing, Machine Design, etc. II. College of Agricultural Sciences—Agriculture, Horticulture, Animal Industry, Botany, Entomology, Chemistry and Metallurgy, Pharmacy. III. Academic College—History, English, Mathematics, Latin, German, French, Physics and Astronomy, Political Economy, Psychology. IV. College of Veterinary Medicine.

Expenses: Free tuition to residents of Alabama; \$20.00 to non-residents. Board in dormitory, and with private families.

For catalogue and further information, address

CHAS. C. THACH, LL. D., President, Auburn, Ala.

ADVERTISING IN '11—The above advertisement for Auburn appeared in the August, 1911, prosperity Edition of the *Clio Free Press* and was reprinted in October 1974.

AWS PREXY—Glenda Earwood wears three hats as AWS president, graduate student in counseling, and housemother for an off-campus girls dorm.

Current Miss Auburn—

More Than A Pretty Picture

By Jan Cooper

Never before have so many of the traditional feminine roles at Auburn University been as widely challenged as they are this year. Some women choose to completely reject the old definitions of their "proper place," while others seek to transform the old models to function more meaningfully. Virginia Martin, the current Miss Auburn, is one of the latter.

"I do most definitely think that Miss Auburn should not be just attractive. It seems that the university wants Miss Auburn to be just a figurehead, just a picture. I don't consider myself to be the dumb photogenic type—I don't mind having my picture made, sure—but I can't stand to be a model, an object. I want to have a function. I don't ask for anything unless I can be a total person. To me, sitting in a chair having my picture made is not satisfying."

In a recent discussion with other women student leaders, Virginia remarked: "One really big disappointment for me has been that I wanted to change the role of Miss Auburn University from the traditional 'sex queen' to somebody that has a brain, and would accomplish something . . . It's very frustrating when someone calls and says, 'We'd like you to be present somewhere and do this and that.' It's real exciting that they want your presence and that you can do something for the university, but then their last statement is: 'Wear something sexy.' I go 'Ugh!' I want to wear a turtleneck sweater, long skirt, and boots just to spite them. But I have had a good time; I can't complain, although it's very frustrating. But I think it's progressed and I hope it will go further after I leave."

Virginia says that her insistence on being a "total person" is a family

EDITOR'S NOTE: Jan Cooper, author of the article on Virginia Martin, is editor of the campus magazine *The Auburn Circle*. Jan is a junior, majoring in English.

trait. "My mother's the same way and my grandmother's the same way: We are not happy unless we're involved and going all the time." Virginia hasn't let her official duties interfere with her school work. Fall quarter, always the most hectic time for a Miss Auburn, she earned a 2.8 grade average (out of a possible 3.0) for her full load of course hours. For recreation Virginia loves all water sports, particularly skiing. She also enjoys cooking, when she has time for it. She even admits possessing considerable skill at the game of pool, which she picked up while working with underprivileged children in a community center during her high school years.

Virginia grew up in Tullahoma, Tennessee, and is very close to her parents and older brother, but decided to cut the apron-strings once and for all when she left for college. She chose Auburn after visiting one weekend with a girl who was a junior counselor in Auburn Hall. "Everyone I talked to was so friendly. I couldn't believe that these people who didn't even know me could be so out-going and friendly. I felt like if this was a sample of the student population, I couldn't help but be happy at Auburn, so I did apply and was accepted and came."

"I remember one lady who said [before Virginia left Tullahoma to come to Auburn], 'I cannot wait to see you Christmas vacation because it's going to be like a big surprise package. You're going to open each new little package inside the big one . . . it's going to be a whole new thing in your life, a whole new section.' Between the good news and the sobs, I remembered that as I was leaving, and it's come true."

AWS President Feels—

Too Many Coeds Sell Themselves Short

By Ann Culbertson '75

"I'm not a big women's lib supporter, but too many women in college sell themselves short. Graduation, marriage, and a family is all that's on their minds—not necessarily in that order," says Glenda Earwood, president of Associated Women Students. Glenda feels that AWS can help women students most by getting them to think about their own value; to make them consider "becoming a doctor instead of a nurse," for instance.

Glenda graduated as a music education major in August with an overall grade point average of 2.95. "I don't have a particularly scholarly background, since neither of my parents went to college—and I'm an only child, so this is a first in my immediate family."

Glenda is now a graduate student in counseling, a result of two factors. "Last year while doing my pre-teaching, I felt awkward trying to relate to the students; I think this will help me. Also, my friends encouraged me to run for AWS president, and entering graduate school seemed the only way I could stay here and do that."

The idea of becoming president of AWS first occurred to Glenda about a year ago. She became interested in the issue of women liv-

ing in the dorms having to sign out at night. "I went to Dean Cater (dean of women) and we talked it out. She was really nice, and listened to my point of view. I spoke with several other people, and they told me to draw up a new plan and submit it for approval." She submitted the plan early winter quarter and Dean Cater approved it. There is now voluntary sign-out for older dorm residents.

The issue of signing out began Glenda's interest in AWS. "I got one problem solved, but so many more existed. My friends urged me to run for president, so I prayed about it and the doors just opened up for me."

Auburn accepted her into graduate school, but a financial problem remained unsolved. "My parents have done their share putting me through four years of college. I couldn't ask them to pay for me any more." An opening for housemother in Wittel Hall, an off-campus dorm for women, solved this financial problem. Glenda became a housemother, perhaps at 21 the youngest one in Auburn's history. This position gave her a place to live and a salary. According to Glenda, she has no problems relating to the girls in the dorm. "We get along fine, and they have never challenged my authority. So far my role as a disciplinary hasn't really been tested strongly. It

makes me feel better about my future in teaching, knowing I can handle this situation."

Since becoming AWS president, Glenda has been extremely involved in trying to find out what improvements women students are interested in most. The AWS surveyed dorm residents concerning existing policies for campus housing. The trend in survey responses was toward more lenient rules. "We (the AWS officers) discussed the matters with Dean Cater, and as a result women students on campus are enjoying more freedom than ever before. The rule on male visitation wasn't changed though. Men still aren't allowed in the dorm rooms except for certain hours on weekends."

Presently, Glenda feels action in AWS is at a standstill. "A few months ago we had monumental problems to solve. We've taken care of the big issues staring us in the face, and right now I can't see what needs to be done. We've accomplished many goals since last year, but most important I feel we have proved the value of the AWS organization to women students." A year ago the future existence of AWS was questionable. The student government debated the effectiveness of AWS as a campus organization, and came close to abolishing it. When Glenda became president, she felt as though she was on trial. "I entered office in the

SGA President 'People-Oriented'

By Kaye Lovvorn '64

John Wiley's main beef about Auburn is that it's too big to develop much rapport between students and professors. And as Student Government Association (SGA) president, he has tried to do something about that. Like other students before him, he found that nothing much could be done about bridging that gap: "I guess it's impossible at a big university like Auburn, but we miss a lot."

In an interview in his office, John prefers sitting on the corner of his desk rather than behind it as he talks about himself as Auburn student, as future law student, and as SGA president. He admits that he came to college "because it was the thing to do" yet somewhere in the back of the mind there must have lurked an image of "college" as it is supposed to be, the idea of sitting at the feet of a great scholar so to speak, or of being able to go by a professor's house and if the porch light was on, knowing you were welcome in for a talk, because John laments the lack of that opportunity at Auburn. Although he hurriedly points out there are professors who are willing to devote time and energy to students outside the classroom and the scheduled office appointment and who even "force you to look at somebody else's point of view. Of course you soon get opinionated again, but at least it opens your mind to a whole different idea of what's going on in the world."

John isn't resentful that there is not more such contact at Auburn. Just wistful. And realistic.

Last fall he and his fellow officers recruited some interested professors and tried to set up a program in which students and professors could really get to know each other—have a general bull session, discuss a book or whatever—but the program bombed. To quote John, "It got too organized and we were duplicating the Free University and Continuing Education courses. We wanted it to be spontaneous. Maybe it just isn't possible at Auburn, but being associated with faculty and administrators on a personal basis is a part of getting an education. We are with our contemporaries all the time, but rarely do we ever get to know a professor very well. We seldom have the same professor twice. We meet in large classes and in 9 or 10 weeks we move on to another course, another classroom, and another professor."

"Getting an education is not just studying, not just academics but facing decisions,—whether or not

to get married, what to do about sex and drugs—all these things confront students, and it would help if students had somebody to talk to about these things, a close professor, for instance. We miss that at Auburn."

John, the son of a Baptist minister with a doctorate in psychology, grew up "people-oriented" as he calls it. "My whole family was always talking about psychology, about the family, the home, kids, drugs." So it is not surprising that when John declared a major at Auburn he chose psychology. Auburn's psychology program has been undergoing tremendous growth in the last two or three years, and although John says he doesn't know if it's the difference in the courses that he is taking or the focus of the department but he says he sees it "beginning to get away from the rats and the monkeys in the labs to human beings."

"One thing had bothered me that there seemed to be so much emphasis on rats and monkeys and I can see them as important in studies in behaviorism, but it's difficult for me to generalize from a rat to a human being. It may just be the courses I'm taking but it seems that lately there is more emphasis in humanism and society. I know that

the laboratory is important but you have to be careful about generalizations. You just can't be cut and dried with people, especially when you're projecting from a rat."

Politicians on any level—college ones too—usually come out with a platform, a slate of promises, about what they'll do if they are elected. When John ran for SGA president last spring, he says "I didn't promise anything. I just said, 'I'll do the best I can'. I could have said I could do everything in the book, but of course I couldn't."

"It really encouraged me that when you talk straight to people and say you'll do your best, that they appreciate it. I think if a national candidate can convince the voters that he is honest, that he is in the race not only for the \$200,000 salary or whatever, but because he believes in the job, in system he could go anywhere."

And John may be putting that theory to the test one of these days, because he doesn't quibble about his interest in politics and government on more than the SGA level. After he graduates, he's going to law school, probably out-of-state because he says, "I was born in Birmingham, I grew up in Birmingham, I've never been anywhere else but Alabama and I'll probably marry somebody from Alabama and come back and spend the rest of my life here, but I think I

Pretty Picture

(Continued from page 6)

casting courses next quarter. She is very interested in working in education television or public relations, as well as teaching.

Travel is also in her plans. Her mother, originally German, met her father when he was an American soldier stationed in Germany. While growing up, Virginia visited Germany three times to see relatives who remain there. These trips kindled a love of foreign places.

Does she include marriage in her plans for the future? "I think it's ridiculous and it makes me mad for somebody to say that you just went to college to find a husband. That's ridiculous—I don't need a husband!" she laughs. "I'm a self-functioning individual. I can go out on my own and be just as happy with or without a man. If I happen along the way to fall in love with somebody that I want to spend the rest of my life with, whom I think would be part of my life and would make my life happier, then sure, I'll get married."

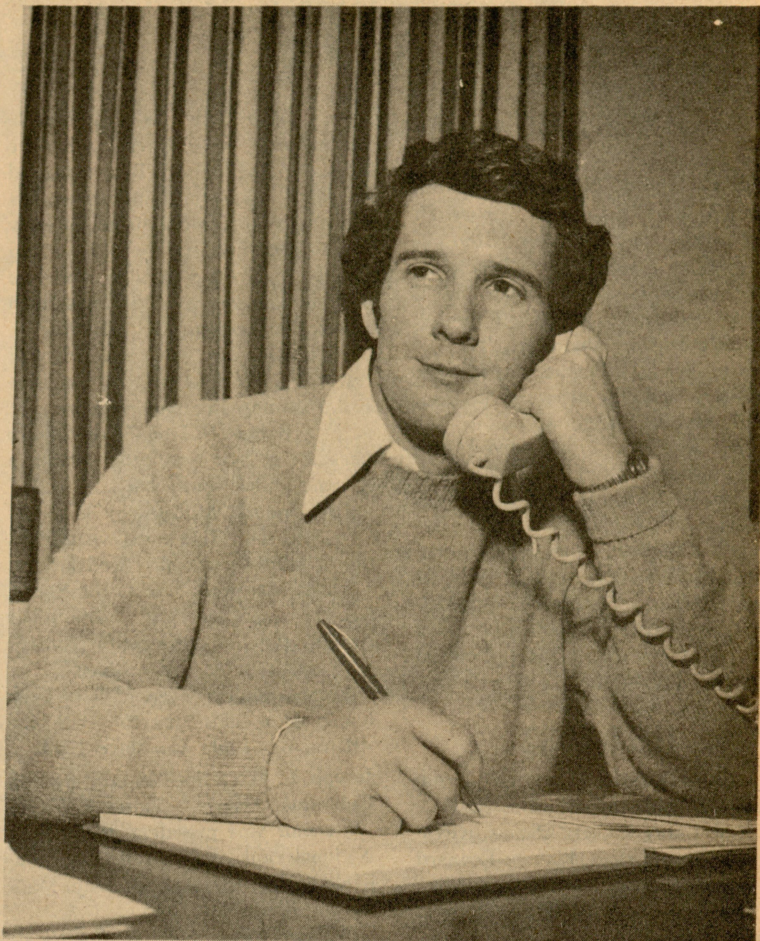

"But I'm not ever going to be to the point where I marry just because I need somebody to depend on. I can depend on my self and anyone who can't—they're in trouble. It bothers me when you reach your senior year to see the people that have been dating for a month or two and all of a sudden they decide they're going to get married. It's like: 'Well, we're seniors and we're graduating and we don't want to go off to some big city and start all over new, so we'll go there together.' People take marriage so lightly."

However, she believes that attitudes toward marriage are changing. "Just the people I associate with, I can see how they've changed from their freshman year to now

and, although a lot of people say that it's just an excuse because they haven't found anybody, I don't think so. I really think that they have seen many other things in life that they can do and can be happy with, and that marriage isn't a criterion that they have to fulfill."

This doesn't mean that Virginia is ready to join the ranks of the radical feminists. "I sympathize with them in that I believe everybody has their individual goals and purposes. If that's really what they're for, then I respect them. But I don't like anybody to try to force their beliefs on me. I'm my individual self and I have my own individual beliefs. I'm adult and mature enough to make up my own mind. I'll listen and respect anything the radicals have to say; it may or may not change my attitudes. But I don't expect them to get mad or violent because I don't agree. Sometimes they're so wrapped up in what they believe that they fail to see the other side. I think you have to weigh both sides."

In an interview for the campus radio station, Virginia was asked if she thought that she represented the typical Auburn coed. She replied that she didn't think there was a "typical" coed. Reflecting on that interview later, she declares, "I don't like that word 'typical.' It bothers me. To label Auburn women typical would be an insult to the whole population. I don't want to be typical. I'm an individual and I hope and I feel that everyone on this campus is too. That's what I like about Auburn; the majority of people are individuals and I respect them for their individual ideas and their individual selves."

LOOKING OFFICIAL—The photographer caught SGA president John Wiley behind his desk looking official, but he much rather sit on the corner of it and talk about his favorite topic—people and what makes 'em tick.

ought to get a little wider experience of people."

John sounds pretty much like a politician when he says "I have a great abiding faith in the system. When people say that the system doesn't work because the president was almost impeached, I say that that is proof that the system does work. I'd like to be able to contribute that system's working—a system that is a system of laws rather than a system of men."

But he sounds more like an idealist when he talks about motivating students. "That's what I liked about the streaking—you had everybody interested, out roaming around, with enthusiasm. Just think what you could do if you could get students that interested in other things—you could reinstate the classics at Auburn, get the library better equipped. But he admits that he can't think of anything other

than sports that motivates students now.

On the subject of the Associated Women Students Association, which was a hot political item on campus about a year ago when AWS was almost abolished, once more John's candor comes forth. "We might as well face it. Men and women are not treated equally on the Auburn campus. Women need a separate group to represent them, to work for the ERA, to work for getting a woman on the Board of Trustees, working to look after the rights of women exclusively."

Talking about his administration and about student government as a whole, he feels that it is handicapped by the fact that "By the time you know who to talk to about what, your term of office is up. The ideal thing would be to elect an SGA president their junior year and then let them run for re-election the following year."

HEMPHILL ON CAMPUS—Paul Hemphill (left), freelance writer and Auburn alumnus, visited the Auburn campus in November and spoke on his experiences as a writer. Mr. Hemphill, a member of Auburn's Advisory Council for Communications, is shown with Curtis Mauldin, president of the AU Press Club which sponsored the event.

AWS Prexy

(Continued from page 6)

ministration to save AWS from failure."

Glenda has no definite personal plans for the future at the moment. She is a firm believer in leaving as many doors open as possible. Her philosophy seems to be "stay flexible—it's the only road to success." Concerning her future in America's work force, she says, "With the jobs situation the way it is, it seems like versatility is the best answer. I'd like to be a band director someplace in the south, but I also have counseling to fall back on. I haven't started interviewing for anything yet. All I'm sure of is that I won't go to Birmingham, my home town. It's too big and dirty."

AUBURN ALUMNALITIES

1889-1920

John L. Brown '89 has moved from Stamford, Tex., to Frisco, Tex....E.H. McCowen '11 has moved from St. Petersburg, Fla., to Cleveland, Tenn....Louis E. Stotlar '15 has moved from Herrin, Ill., to Phoenix, Ariz....H.A. Brosnahan, Jr., '17 now lives on Route 3, Pensacola, Fla....Dr. Robert O. Suddath '19 has moved from Piedmont, S.C., to Rome, Ga....

Allen K. Wood '20 has moved from Birmingham to Palm Beach, Fla. . . Charles W. Edwards '20 of Auburn is area vice president of Area IV of the Executive Committee of the National Retired Teachers Association. Area IV covers Alabama, Florida, Georgia, Mississippi, South Carolina, and Tennessee. Mr. Edwards is the retired registrar of Auburn.

1921-1932

Alfred D. Boyd '21 has moved from Oakland, Calif., to Camarillo, Calif. . . Lt. Col. Carey A. Clark '28 now lives in Green Cove Springs, Fla. . . Leonard F. Rogers '30 now lives in Winona, Miss. . . A. Kelly Trawick '30 now lives in LaGrange, Ga. . .

Price J. (Jack) Young '31 has retired from the staff of the Alabama Farm Bureau Federation after almost 20 years. At the state meeting in Mobile in 1973 he received the Federation's Special Service to Agriculture Award. After graduating from Auburn Mr. Young spent several years in Arkansas with the Arkansas Extension Service before returning to Alabama in 1951. He continues to operate a farm near his home in Hokes Bluff and keeps fit by playing golf several times a week.

Dorothy Parker Middleton (Mrs. J. V.) '31 now lives in Greenville, S. C. . . Mr. and Mrs. John T. Holstun, Sr. '32 (Pauline Latimer '41) now live in Rome, Ga. . .

Harvey C. Pitts '32 now lives in Phenix City. . . Alex T. Burton '32 has moved to Pensacola from Shalimar, Fla.

1934-1936

R. Stanley Reaves '34 retired in April

after 38½ years with Allis-Chalmers. He was manager of engineering for the Combine Division. Mr. Reaves missed his class reunion at Auburn because of a broken leg suffered in a fall in early November. For the benefit of old friends who might want to wish him well, his address is 1308 North Sixth Street, Blue Springs, Mo., 64105....

Fred Birdsong '34, vice president of research and development for Blue Bell, Inc., now lives in Greensboro, N. C. . . Robert N. Hoit '34 of Auburn became governor of the Alabama Kiwanis District on Oct. 1. . .

Dr. Gerald H. McChesney '35, after 7 years with the USDA and 33 years in active veterinary practice, retired on Sept. 7. He is now consultant to the Rome, Ga., Humane Society and "the hermit of Auburn Point on the beautiful banks of the Contaminated Coosa River." . . .

Frances Bailey Tegeder '35 has been home economics director with the Atlanta Gas Light Co. since 1966. . .

Joseph L. Whiteside '36 now lives in Columbia, Tenn. . . James E. Vance '36, senior vice president of the First National Bank of Birmingham, is now banking chairman of the Alabama State Savings Bonds Committee. . .

William Wilson Hill '36, director of the Opelika Achievement Center, has received the Professional Award, given by the Alabama Society for Crippled Children and Adults to a full-time, professional person for service to handicapped persons. The award is a statewide honor.

1937-1940

Mosey T. Gresham '37 now lives in Washington, Ga. . . Joseph L. Stewart '37, chairman of the board of the Armstrong Rubber Co., was on campus in October to address a seminar in the School of Business....Dr. Robert Richman '38 now lives in Daytona Beach Shores, Fla....E. Andrew Miller '38 now lives in Cape Coral, Fla....Francis Bass Perrott (Mrs. Walter W.) '39 now lives in Gadsden....

Col. and Mrs. Harry L. Bush '40 (Mariolive Strozier '44) now live in Granite City, Ill....Judson D. Gary '40 now lives in Greenville....Wiley H.

Parkman '40, director of the Veterans Administration Regional Office in Montgomery, has been commended for his "outstanding performance" during the past year.

1941-1945

Mrs. Edith Kinard Pike '41 now lives in Sarasota, Fla. . . James A. Green '41 of Birmingham retired from the Soil Conservation Service of the USDA on Dec. 31, 1973, and began work as cooperative education officer for Jefferson State Jr. College....W. Wallace Wise '41 is with the Farmers Home Administration in Lake City, Fla....

Elver R. Callaway, Jr., '41 now lives in Truckee, Calif. . . Jack P. Keith '42 has been re-elected to a three-year term on the Board of Directors of the Federal Reserve Bank of Atlanta. He is president of the First National Bank of West Point, Ga. . .

New Orleans weather forecaster Eulah L. Hill '42 has been named "Outstanding Line Forecaster of the Year" by the National Weather Service. The Outstanding Forecaster is chosen by fellow weather forecasters all over the nation. Mr. Hill has been in the field since 1942 when he entered the Army Meteorological Cadet Program at the University of Chicago. He has been at New Orleans since 1955....

James E. Boman '43 now lives in Jasper. . . John C. Cole '43 has returned to the States from Scotland where he is with Monsanto in Greenwood, S. C. . . Mary Wren Avery '43 now lives in Talladega....Johnny H. Davis '43 has moved to Jeanerette, La....Estes B. Sherrill '43 now lives in Sheffield....

Mr. and Mrs. William D. (Doug) Nettles (Ruby Suber '43) now live in Abilene, Tex. Col. Nettles is "out of retirement with the Air Force and back to work for the Texas State Department of Health."

Laura Collier Mathews '44 now lives in Norfolk, Va. . . Mr. and Mrs. Dudley Martin '44 (Clara Jean Liles Martin '68) now live in Alexander City. . . Annette Cheney Carr (Mrs. Thomas C.) now lives in Smyrna, Ga. . . J. Marshall

Beck, Jr., '45 has moved from Anderson, S. C., to Roanoke Rapids, N. C.

1946-1948

Dr. Phillip F. Eiland, Jr., now lives in Stamford, Conn....Mr. and Mrs. Forrest McCullars '46 (Hazel Martin) live in Vero Beach, Fla., where he is Indian River County Extension director....Robert E. Mitchell '46 is a retired Army lieutenant colonel and lives in Pensacola, Fla....

John Dixon Bridgers '47 is athletic director at Florida State. He has been at FSU since 1973 when he came there from South Carolina. He and his wife Frances have two sons, John Dixon and Donald Hamilton. Mr. Bridgers' coaching experience includes tenures at the University of the South, Johns Hopkins, the Baltimore Colts, Baylor, the Pittsburgh Steelers, and South Carolina....

Rash Retires from Pharmacy

By Dru McGowen
AU News Bureau

Retiring Pharmacy Professor Joe Rash '41 has seen a lot of changes in pharmaceuticals and pharmacy practice in the 31 years he's been in the business. The most impressive change, he says, is in "third party pay"—medicaid, medicare, union, and insurance care.

And, although such may be a step toward socialized medicine, Prof. Rash says, "It does allow more treatment for more people, and health in general is better, with drug prices more stable because of it."

But he doesn't agree with the "generic prescribing" which he says the government is trying to enforce. Some drugs really are better than others because of their form or absorption by the body and "cheap drugs may be just that."

Mr. Rash, associate professor of pharmacy, retired Dec. 31 after 26 years of service. Prior to joining the staff, he worked for five years in a drug store, and was associate state toxicologist for five years while earning his master's degree at Auburn. He also taught high school math and science for nine years in Mississippi, Virginia, and Alabama. "I guess you'd say I enjoy teaching best, judging from the

time I've put in at it," he says. "Students are people, and I like people."

Prof. Rash began his teaching duties at Auburn in pharmaceutical prep and public health. Then he taught dispensing, and for the past few years has taught pharmaceutical math.

Jobs appear to be plentiful and varied for young graduates, Prof. Rash feels, "from retail drug stores to research. Detail men are hired by companies as the go-between doctor and pharmacy."

And Prof. Rash predicts that more pharmacists will have "patient profiles" to better serve their clientele in the future. A patient profile records idiosyncrasies and allergies the patient may need to guard against. "It is one of the new looks in the pharmacist as a paramedic."

Prof. Rash graduated magna cum laude with majors in mathematics and chemistry from Carson-Newman College, and after advanced work at Georgia

Tech, received both the B.S. and M.S. degrees in pharmacy from Auburn University. He has received the Lehn Fink gold medal for the Advancement of Pharmaceutical Science, and the Merck Award for Excellence in the Dispensing of Pharmacy.

He is past president of Phi Kappa Phi, and holds membership in Rho Chi, Phi Delta Chi, A.P.A., and A.P.A.

Presented a fishing boat by students and faculty of the School of Pharmacy, the retiring professor says he will "learn to fish again." He also plans to "deal with plants," do a little gardening and some travel with his wife, Cora Lee.

The couple have a daughter, Jo Ellen Rainey '72 of Birmingham.

ALUMNALITIES

is well known in the financial world and he has published articles on marketing in such publications as the *American Banker*, *Burroughs Clearing House* and *Finance Magazine*, where he was marketing editor in 1967.

William Allen Lamkin '48 is with Howell Landscaping Co. in Sea Island, Ga.... Dr. S.C. Adamson is now associate state superintendent of Schools in the Georgia Department of Education. He lives in Marietta, Ga....

Dr. Jones has been with Merck since 1969 when he left Auburn's Extension Service division of animal health, which he helped organize. He and his wife Claire have three children.

Robert R. Norris '57, vice president and general manager of the Lubbock, Tex., *Avalanche-Journal* newspapers, has been appointed to the board of directors of the Texas Tech Foundation.

Dean Smith Advisor in Guam

By Roy Roberson

Dr. E.V. Smith '28, dean and director emeritus of the School of Agriculture and Agricultural Experiment Station at Auburn, left November 3 for a year in Guam, where he will serve as advisor to Dr. Wilfred P. Leon Guerrero, dean of the College of Agriculture and Life Sciences at the University of Guam.

The U.S. Congress recently authorized the establishment of an agricultural experiment station at the University of Guam, and Dean Smith will use his wealth of experience in agricultural administration to help develop objectives and establish goals and priorities at the new facilities. He also will help Dean Guerrero in recruiting faculty members to staff the station.

Guam is the western-most U. S. possession, prompting Guamanians to refer to their island as "The place where America's day begins." The U. S. maintains a large air force base there and smaller army and navy installations. Although Guam is a small island, being only about 30 miles long and

7 miles wide, its position makes it strategic in more than a military sense. Because of its proximity to Micronesia and the trust territories, Guam can provide increasing scientific and cultural leadership for this vast Pacific region.

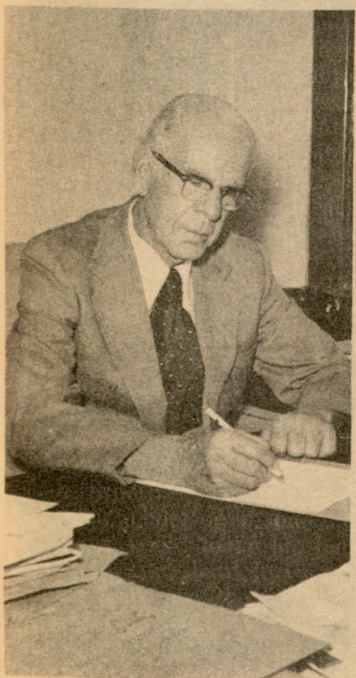

Today Guam's population of approximately 100,000 is largely dependent on imported food. According to Dean Smith, "We hope to assist the new agricultural experiment station to develop a program of research, which with the cooperation of the Agricultural Extension Service, will aid the people of Guam to become more independent in food production."

Truck crops and tropical fruits constitute the bulk of the island's agricultural production and appear

Auburn Clubs

The Charlotte (North Carolina) Auburn Club met on Dec. 6, at the Tega Cay Country Club for a dinner-dance. Mr. Buck Bradberry, Alumni Associate Secretary showed films of the Auburn and Montgomery campuses followed by a brief summary of Auburn's latest academic and athletic advancements.

Past presidents Roger Shad '51 and Bill Stallworth '64 were presented plaques for their contributions to the Charlotte Auburn Club. New officers for 1975 are: president, Bob Reid '65; 1st vice president, Hassel K. Nix '41; 2nd vice president, Jim Boone '61; secretary, Janice Sharpe; treasurer, Helen Reid '64; and the steering committee consists of: Frank Castleberry '59, Tom Rankin '64, Carl Sharpe '70, Roger Schad '51, Bill Stallworth '64, Bill Sugg '57, and Richard Joyner '70.

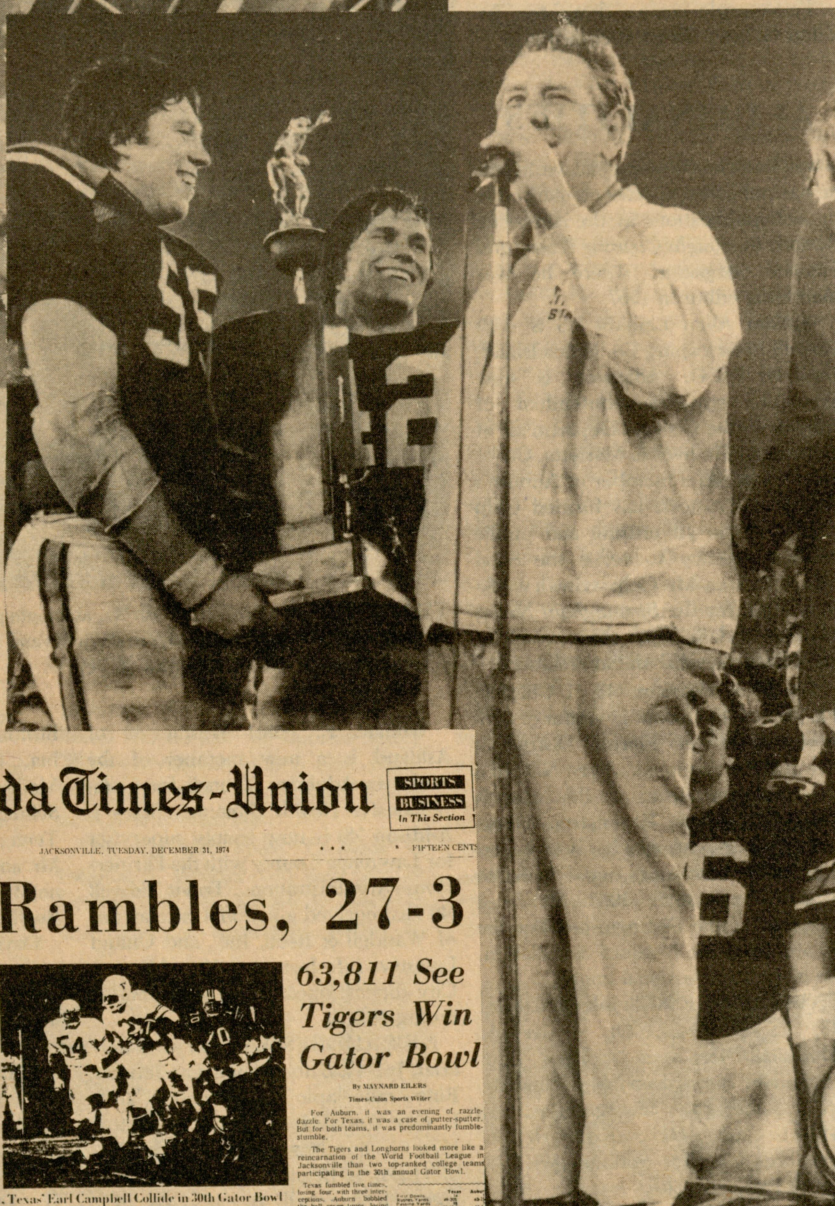

E.V. Smith '28

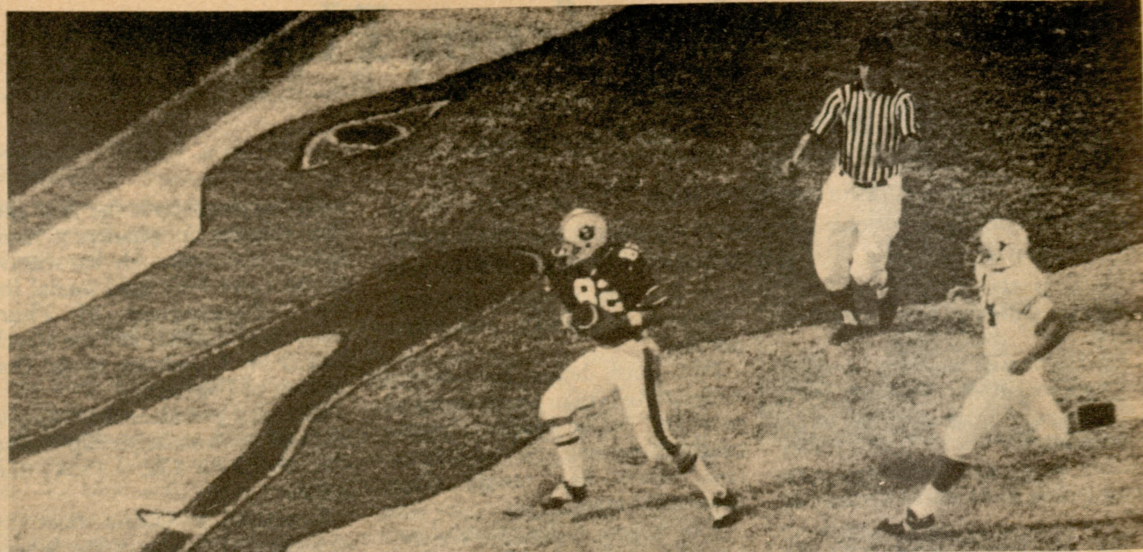

A NEW CAREER?—Nope, Coach Jordan was just clowning around before the game.

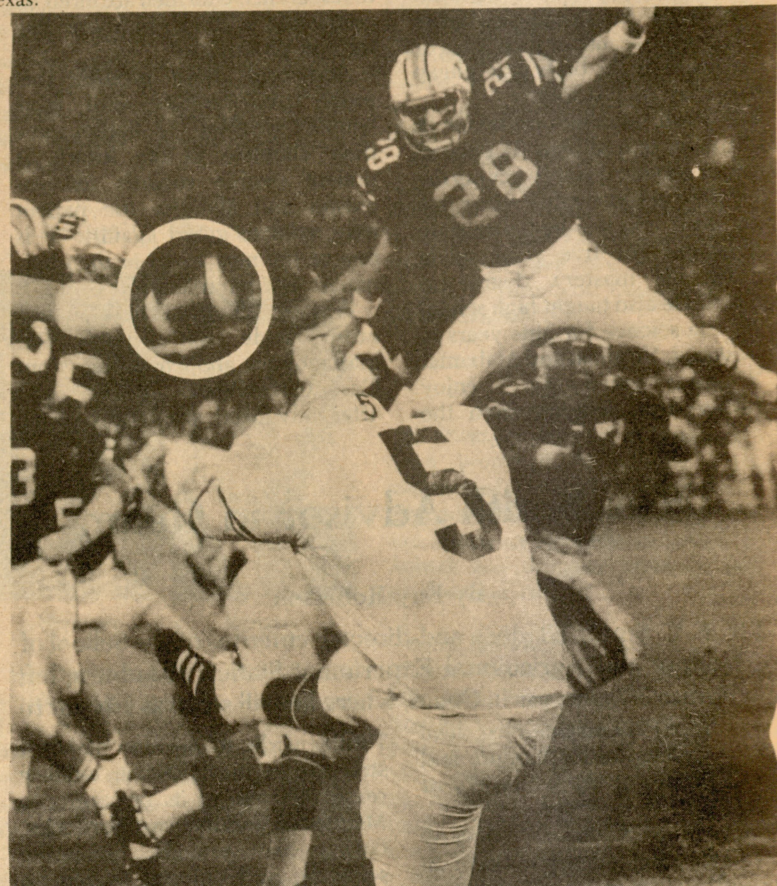

Gator Bowl 1974

ANOTHER TROPHY—Coach Jordan and AU captains Lee Gross (left) and Mike Fuller accept another Gator Bowl trophy. The Tigers have won in their last three appearances in the Gator Bowl: '70, '72, and '74.

TD COMING UP—Ed Butler takes off across a painted alligator after taking a 14-yard scoring pass from Phil Gargis. Butler scored two TDs in the 27-3 win over Texas.

BLOCKED PUNT—Jim McKinney (26) blocks a punt in the end zone for a safety. And, contrary to appearances Lance Hill (28) hasn't taken up flying.

63,811 See Tigers Win Gator Bowl

By MAXWELL KILPATRICK
Times-Union Sports Writer

For Auburn, it was an evening of triumph. For Texas, it was a case of pure defeat. But for both teams, it was predominantly a disappointing one.

The Tigers and Longhorns looked more like a re-enactment of the World Football League in Jacksonville than two top-ranked college teams participating in the 30th annual Gator Bowl.

Texas' limited line play, being four with three interceptions, Auburn's defense and ball seven yards, being

MOST VALUABLE—Quarterback Gargis accepts the award as most valuable player at the Gator Bowl. Clustered around are teammates including Gaines Lanier (98), Pat Jones (68), and Bert McGuffey (30).

FEEDING—Phil Gargis had food for the Dolphins at Marineland before the Gator Bowl, but he helped send the Longhorns home hungry for some points.

THE AUBURN ALUMNEWS

Basketball Bouncing Back at AU

By Perry Ballard

It's pretty easy to understand why Auburn basketball fans are in a good state of mind these days. After all, the Tigers of veteran coach Bob Davis are off to their best start in years, running and shooting their way to a 6-3 overall record and a 2-1 SEC slate.

And what's surprising about it all is that the Tigers are finding success even though starting three freshmen. Guard Stan Pietkiewicz, center Myles Patrick, and forward Mike Mitchell, thrust into a situation that's uncomfortable even for juniors and seniors in the tough SEC, have all performed well. In addition to that threesome, Coach Davis gets plenty of help from starters Eddie Johnson and Gary Redding at guard and forward, respectively, and from key subs Wayne Bracy, Bob Bond, and Glen Moon.

Pepto Bolden, the SEC's leading rebounder a year ago as a freshman, has played in only one full contest this season due to a broken bone in his left foot suffered during the Tigers' second game of the season. He is expected back in the line-up by mid-January.

The Tigers began their season against the Golden Brahms of South Florida before 6,266 in Memorial Coliseum. The visitors sported an impressive line-up which included three junior college All-Americans, but Auburn rolled to a 77-52 win.

The Tigers grabbed a 37-24 half-time lead, and then with the help of a stingy defense coasted in the rest of the way. Bolden led Auburn scorers with 27 points. He also grabbed 15 rebounds.

Auburn's second outing was also its first road trip, as the team traveled to Indianapolis, Indiana, to face Butler University. With Redding pouring in 18 points and Johnson adding 16, the Tigers came out on top, 74-71.

The Plainsmen took a 39-35 half-time lead, thanks to Redding's antics and Johnson's six straight points to end the half. Auburn maintained leads of three to five points most of the second half, extended it to 10 at one point, and then held off a late Butler surge.

The team returned home the following Monday and rolled to an 85-77 victory over Western Carolina.

Auburn jumped out to a 16-point lead in the first half, but then ap-

parently forgot how to play defense and led only 42-39 at half-time. Western Carolina cut the gap to one early in the second half before the Plainsmen scored 14 straight points to go ahead 64-49 and wrap it up. Redding was the high scorer with 24 points.

That three game stretch—which incidentally marked the first time since 1966 that the team had won its first three contests—ended what Davis called "Our warm-up season." As the coach put it at that time, "We have passed the trial of water, but now it is time for the acid test," looking ahead to a crucial four-game road trip in five weeks.

Blacksburg, Va., was the first stop, and the Virginia Tech Gobblers gained revenge from a loss last year, nipping Auburn 83-82 on two free throws by Russell Davis with one second left.

Davis was fouled going for a loose ball after Auburn's Johnson had missed a chance to give his team a two-point lead with 13 seconds left. Johnson had scored on a short jumper to put the Tigers ahead 82-81 and was fouled but missed the free throw.

The Tigers, shooting 52 per cent from the field, were led by Mitchell with 24 points, Johnson with 20, and Redding with 15.

Auburn headed to Minneapolis, Minn., after a two week Christmas layoff, and there the team placed third in the Pillsbury Holiday Classic. The Tigers lost the first game, 63-59 to Clemson in the opening round, but bounced back a night later to take a 73-69 win over Navy for consolation honors.

Redding paced the attack on opening night, scoring 21 points. Johnson took over a night later, pouring in 24 points as the Tigers built up a sizable lead and held on despite a flurry of Navy points late in the game.

Johnson and Mitchell were named to the Five Man all-tournament team.

The Plainsmen opened conference play a week later, traveling to Knoxville, Tenn., to face Tennessee. The Vols proved rude hosts however, getting a 98-81 win.

The Vols shot 61.5 percent from the field, and at times held 16 and 23 point leads. The Tigers refused to die, though, and with 3:00 remaining in the game cut the deficit to 12. The Vols salted it away though, with a deliberate keep-away game against Auburn's zone trap.

Johnson led the scoring with 24 points, followed by Pietkiewicz with 19 and Redding and Mitchell with 15 apiece.

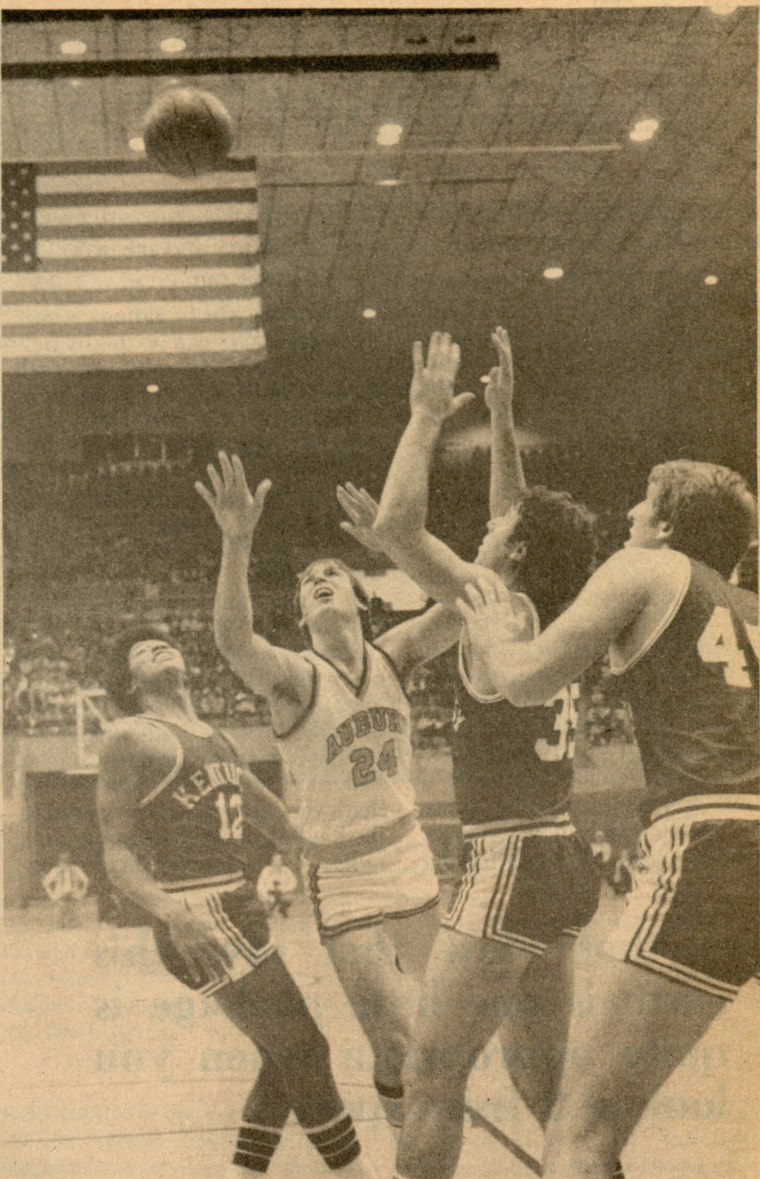

The Tigers evened their conference record at 1-1 by bombing the Ole Miss Rebels, 104-86, behind the 30-point production of Mitchell and the 27-point output of Johnson. It was the first time since 1972 that the Tigers had scored more than 100 points.

Auburn managed a 49-39 half-time lead, and with Johnson hitting the long perimeter jump shots and Mitchell working well underneath, the Tigers opened up a 20-point lead midway through the second half and coasted in before a crowd of over 8,000.

That win left Davis optimistic, though 16 SEC games and two non-conference contests still lie ahead.

"We've got a whole bunch of young kids in a hostile league, but that's no reason to cry over us," he says. I'm well pleased with our offensive play so far, and if we can solve some defensive problems here and there and get that up to par, people are going to start hearing from Auburn University."

Editor's Note: Since the completion of Perry Ballard's article, the Auburn Tigers have tied Kentucky and Alabama for the SEC's top position with wins over Kentucky, Vanderbilt, and Mississippi State. The victories bring Auburn's record to 10 and 3 overall with a 5 and 1 SEC slate. Pepto Bolden, the SEC's leading rebounder last season, returned to the Tiger line-up seeing action against Vanderbilt and Mississippi State.

ALL HAIL AUBURN—Freshman sensation Stan T. Pietkiewicz follows a missed shot for the rebound and two points between three Kentucky defenders including senior standout Kevin Grevey (45). Stan Pietkiewicz and Eddie Johnson have teamed up to form the youngest and most devastating backcourt combination in the SEC.

Astronaut Talks About Space & Earth

As you look at this beautiful little thing [Earth], you are aware that any boundaries we draw are indeed arbitrary and are products of our own imagination because when you look out there, Earth's a little ball. It's an integral little ball, all interwoven. The problems that we have on this planet today whether they be social, economic, political, physical, or whatever, are indeed global problems with implications that cross all the boundaries. Many of our problems are caused by the existence of these boundaries. Now, I'm not advocating that there ought not be any boundaries or that there are not some natural compartments that are required in order for us to live in this society, but I would like to suggest to you that that same view that says this earth is one little package is quite appropriate when you look at it from space.

And therein lies one of the things I find most exciting about the space program; some of the opportunities

'that view that says this earth is one little package is quite appropriate when you look at it from space.'

that we have ahead of us. These opportunities all stem from this one little characteristic of a vantage point in space. When you can sit back and see the world as a little globe, it makes it somehow easier to think about global solutions to problems. Some of those solutions are practical and some reside in the back of our heads as thoughts and ideas. Rather than talk about NASA's programs let me just give you a smattering of ideas about what could be done. People talk about things being "out of this world." Many of our answers are, even though the problems are right here. Let me give you a couple of examples. One of the most common problems for all of us is called communication. We frequently talk *at* but very infrequently do we talk *with* other people. You've run into that in your business, you've run into that in all your social relations. Now, the space program doesn't offer a way to make our communications more effective in an understanding sense directly; yet it does provide an awful lot of opportunities to increase our understanding.

We recently put up a satellite which we call ETRS. Like everything in NASA language, we have to have an acronym because all the words are too long. This one stands for Earth Technology Resources Satellite. What we've tried to do with ETRS is to find a way to beam communications between various locations. One of the things we have done is to put up a satellite (and it's still operating today) in what we call a synchronous orbit. That's where the orbit of the

satellite is relatively stationary over the ground. We can do this by putting it up at a high altitude. With that satellite you can beam communications to all areas that it sees and if it's high enough that's almost a half of the earth. We placed one of these in orbit over India and turned over its operation to the Indian government. They use this satellite as a means to beam educational programs throughout the country. The advantage over radio is that, first, it doesn't take nearly as much power. Once you have placed a satellite in an orbit, it remains there. Broadcasting requires only the transmitter power and it's sent in a straight line so that's very low priced compared to the kind of things we are use to in radios. You can send television pic-

tures for practically the same price as radio voices. The receivers are extremely simple. They can be built for just a few dollars and it's the kind of thing that every community can own. We have given out plans for how you can build these receivers, how to tune them so they will pick up our stations. We do this here with weather satellites, and they are doing it in India today for communication purposes. Think what it would mean to a country like India, if she could get the message about population control, crop control, health, medicine, and even the daily business of living in a society beamed throughout their country in some way that would reduce their problems. If that happens then it is going to turn right around and make a difference in our relations with them.

Another area that communications can help us is in the area of government relations between countries. It's very important when you have a world that has as many power centers as we have to be sure that there is no misinterpretation and misunderstanding. We can place satellites up in a position so that they can be used to insure that there is indeed direct and continuous communications between these governmental power centers.

Suppose we had a good teacher. Now, all of us can remember when we went to school that you could just about count the number of really outstanding teachers on one hand. That's the nature of human excellence. If it weren't for its limited characteristic we wouldn't call it excellent. What we would like to do is to share this excellence with more people. If we could only share expertise, whether it be in teaching school or in some other field, we could make life better. And we can share it via communications, via the satellite. It won't be too long before we have a capability to place these satellites around where we want them. The one that is over India now is to be

moved back over Appalachia later this year to use in our own experiments to find out what is the best method of coordinating our own educational efforts.

Someday we can do the same thing in medicine. If you have a sick patient in Arizona and you've got the doctor who's the specialist in Houston, it's very hazardous at times to have to transport that patient. One day we are going to be able to hook up a patient in one part of the country with some sensors. We are going to be able to relay information plus a TV picture plus the sound that goes with it, and the doctors that are with the patient are going to have direct access to doctors for consultation in Houston for instance. Operations will be performed in which someone who has a unique talent, say in open-heart surgery, but who can not be present with every patient that needs his help can supervise an operation all the way around the world if necessary. All this is going to be done by satellite link using closed circuit TV and the ability to transfer large amounts of data back and forth. And the transmission will be free once we have the satellites up.

I mentioned the Spacecraft Earth and I would like to come back to that thought for just a second because when you look out at the earth you see that there is nothing around it. It's this little ball which exists entirely by itself. I think the likeness between that and a spacecraft is particularly appropriate because just like a spacecraft all of the consumables that we are going to use for our mission are on board. All of the energy

'We frequently talk *at* but very infrequently do we talk *with* other people.'

we're going to consume is on board. All the waste materials that are produced have to be managed and disposed of within the confines of the spacecraft. In general the big problems are the same. The only difference is the length of the mission.

In our case the Earth is probably going to be our home for many, many years to come and so the problem is far more acute, but the method of tackling the problem of handling the Spacecraft Earth is exactly the same one that we use for tackling the problem of any other spacecraft. You start by cataloging what you have.

That's another task that we can do from space—probably better than any other way. We've had geologists who have scoured the surface of our planet, foot by foot, inch by inch. They've made a tremendous effort, but they are limited because of their own mobility limitations and the human frailties that go with exploration. We can do the same job with a little satellite, and although we can't look down with a satellite and see oil, we can see the geologic manifestations that go along with different mineral forms and different formations of our earth's crust that lead to the efficient and economical tapping of energy sources.

Energy is a big thing. It's on the top of everyone's mind. The gas pump has turned us on to that. Our immediate solution is to find some way to increase our productivity

transmitted to the earth. We are going to recover it. Solar energy's going to be pollution free and unlimited. Now when that day will come, I don't know because that's

and energy sources such as oil and to do it as soon as we can. Probably the satellite programs will go a long way toward pinpointing our exploration efforts. We've already found a great number of mineral deposits from our earth's satellites, and in the future our skylab photography with satellites that are

up to the kids today. It's their imagination that's going to think of how to do these things best, but it's coming and we are going to live to see it. How about crops? I said that the world is interwoven and it couldn't sort out singular problems. Perhaps the most recent example of how this all fits together is some of the wheat deals that we've had with the Russians. A lot of people have a lot of comments on that subject and I don't know what happened. I don't know whether we did a dumb thing or a good thing, but I do know it's a classic example of how a crop's success in one part of our world affects all the rest. It affects you and it affects me. With the right kinds of satellite monitoring, we can know the status of crops around the world daily. We can know when they are infected with disease. We can tell when there are insects. We can tell if there is a drought. There are just so many things we can tell and we can tell it in time to respond so that another part of the world can make up, can compensate for the loss of a crop. On the other hand, economically no part of the world or our country can afford to overproduce. If we

'the problem of handling the Spacecraft Earth is exactly the same one that we use for tackling the problem of any other spacecraft.'

the only way in the space environment.

I predict that one day—and I have no idea when this day will be for we are always pessimistic when we talk about the future, but I will be willing to bet you that I will live to see the day—we will collect solar energy into something that can be efficiently and economically

understand what the market is, we can then intelligently control what we do with our own resources.

If this world is going to continue as a baby spacecraft, we have to conserve our resources not only to keep from using them up, but to make a good life something that we can afford to have. The satellite is the way I think most appropriate to

EDITOR'S NOTE: This article is an excerpt from a speech by Astronaut Ken Mattingly '58 delivered to the Rotary International Conference in Montgomery during May. A classmate of the Command Module Pilot of Apollo 16, Al Morrison '58, introduced the speaker.

Astronaut Mattingly Talks

(Continued from page 12)

accomplish this objective because from its vantage point it sees such a large portion of the earth's surface at one time and sees it in perspective.

We can determine the snow depth. We can measure what will be available when the spring thaw comes around. We can predict what's going to be needed, what the rivers are going to have to carry.

We can tell when people are going to need supplemental water and that affects you and me

We're not setting out to catalogue the earth.

What we are building for you this time is a tool. A truck. A space truck. It has a payload bay that's 60 feet long and 15 feet wide and will hold up to 65,000 lbs. We'll carry it and we'll put it where the user needs it. And if it takes more than that we will just have to find a way to send two of them. We plan to build a fleet of five of these trucks. We hope to get our first flights off in about 1978-79 and to make these

was possessed by a lot of people that said, "It won't fail because of me." It seems to me that has a great deal of application in our society today.

I can't do a thing to alter the course of events in this world. A lot of things I don't like and a lot of things I do, but my efforts as an individual seem rather frustrating. However, I can promise everybody around me just as we did in Apollo that, by golly, it won't mess it up because of my actions.

"It won't fail because of me" and when you put all that together you can do some amazing things. I think the most important thing that came out of the space program that I've seen is what you can do with a few thousand people who are dedicated to a goal.

'someday we are going to be able to go out and change the weather.'

because the economics of agriculture go everywhere and it affects everything we do. Understanding these things will give us some kind of control.

Today we monitor the weather. We take pictures essentially, and transmit them to the earth and we make them available to anyone. The plans for how to build a receiver are available and are distributed by our Department of State. Countries all over the world are using this weather information. We have some work going on which will tell us how to interpret some of these things we see. Today our best bet is to look and we can say, "Yes, I see a hurricane or typhoon." If we go on a step further, since energy is the heart of weather phenomena, someday we

completely operational in the 1980's. That's really not far away. Most of you are in the business of dealing with people almost exclusively and when I talk to folks I get the impression that you think that the space program is in the business of computers. Well, it just taint so. Indeed we have had a lot of computers in our program and we'll have more in the future. They are very magical things, but that's not how we went to the moon and that's not how we spent 84 days in orbit around the earth. That's not how we are going to make the shuttle work either. We have one unique tool and it's unique only because we recognize it and that's people.

I wish everybody could come and spend a couple of days walking

'We have one unique tool and it's unique only because we recognize it and that's people.'

are going to be able to go out and change the weather. We will be able to destroy those dangerous elements of the weather patterns such as hurricanes before they can hit the land masses. We will be able to alter the climate, to create rain by changing the energy distribution that is in the atmosphere.

Now that's not going to happen tomorrow, that's several tomorrows ahead but those things are going to happen. The imagination is the only limit. Hard work and perseverance will make for all the rest.

One of the reasons I'm excited about all this is that I'm working on a program that I hope is going to help make all of this possible. I'm working on what's called a shuttle. That's not a very glamorous name but it's a very glamorous concept. Our idea is to make a spacecraft which will lower the cost of space flight 10 times or more. We want to make all these things I've described something which the civilian community can afford economically. And to do that we are going to build a spacecraft that can be reused. It's really a truck.

It has no goals as the programs of Apollo and Skylab. We're not setting out to explore the moon. We're not setting out to explore the sun.

ALUMNALITIES

1954

Dr. John Cutts of Mobile has been named to the Alabama Advisory Council for Comprehensive Health Planning....Dr. Mel Fuller, associate professor of physical science and science education at the University of Arkansas at Little Rock, has received a Donaghey Foundation grant to visit and study the educational programs and facilities of 13 science centers in California, Texas, Georgia, and Florida during the next two years....

A. Lee Bendall has formed his own company in Birmingham as a representative of Baltimore Aircoil Co., Inc., which manufactures cooling equipment. Mr. Bendall is former vice president and secretary of Tempair Mechanical Inc., an air conditioning

dealer-contractor in Tampa, Fla. Mr. and Mrs. Bendall (Jane Long) have a daughter Lynn, who is a sophomore at Auburn, and a son, Steve, 11....

B. Gene Burton is with Faulkner State Jr. College in Bay Minette....Lt. Col. William R. Long, Jr., has received his second award of the Air Force Commendation Medal at Scott AFB, Ill. He was cited for meritorious service as chief of special services for the 824th Combat Support Group at Kadena AB, Okinawa.

NEW ADDRESSES: Mr. and Mrs. George E. Uthlaut (Dorothy Jeanne Stafford), Sugarland, Tex.; Foster R. Hartline, Baton Rouge, La.; John D.P. Arnold, Jr., Tullulah Falls, Ga.; Joe G. Hicks, Fairfax, Va.; Lt. Col. David D. Jones, Andrews AFB, Washington, D.C.; Mr. and Mrs. William A. Manly, Jr., (Patricia Lasseter '53) Arlington, Tex.; William A. Rogers, Jr., Georgetown, S.C.; William E. Patrick, Carrollton, Ga.; Culver J. Deloach, Jr., Temple, Tex.; Joseph W. McGinley, Jr., Winter Park, Fla.; James P. Sherer, Hartselle.

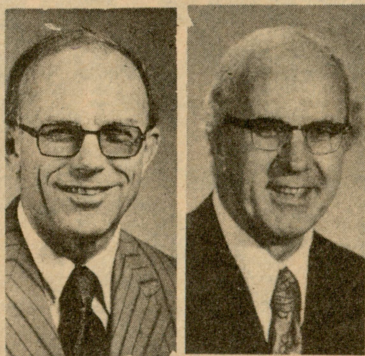

Jennings '55) now live in Atlanta, Ga....Lt. Col. and Mrs. Gary W. Brindley (Jimmie Frances Rogers '60) now live in Petersburg, Va....Edward F. Williams, III, has been re-elected to a third term in the Tennessee General Assembly. He is a consulting engineer and vice president of RAMCON, Inc.

Thomas E. Edmundson is with Haven Knitwear in Winston-Salem, N.C....Walter Roy Barron of Baton Rouge, La., is new president of Nuclear Systems, Inc., a multi-operation company which manufactures and markets radioactive sources, electronic instruments, and components for medical and industrial use. Mr. Barron joined the firm in April, 1974, as a vice president....

William H. Harris is now assistant coordinator of power plants for International Paper's Southern Kraft Division, headquartered in Mobile. He has been with International Paper since 1956 and worked at mills in Mississippi, Louisiana, Arkansas, and Florida before returning to Mobile in 1973....

Mary Hale Brandon received the M.S. in education from Samford University on Aug. 17.

Faces in the News

Reeves

Hiatt

Charles M. Reeves, Jr., '49 has been named Corporate Credit Director for WestPoint Pepperell at Corporate Offices in West Point, Ga. He and his wife, Lois, have two sons, Michael, and David, and one daughter, Nancy Elizabeth.

Tee H. Hiatt, Ph.D., '49 and a fellow UAB professor have been awarded a \$395,560 contract for the "Development of Student-Paced Teaching Modules for Graduate and Continuing Education in Hospital and Health Administration" jointly sponsored by HEW & the Graduate Program in Hospital & Health Administration at UAB. Dr. Hiatt presently does educational research for the School of Community and Allied Health Resources at the University of Alabama in Birmingham.

1955

Richard E. Britton has been appointed department chief of instrumentation for the central design engineering department at International Paper in Mobile....John Logue, managing editor of *Southern Living* magazine, has been named editor-in-chief of the Oxmoor House Books Division of the Progressive Farmer Co. He had been part-time editorial director of the books division. He will continue to write and edit a football annual appearing in *Southern Living* each September.

NEW ADDRESSES: Dr. Mitchell Rohleder, Englewood Cliffs, N.J.; Dr. William E. Fann, Houston, Tex.; Rex S. Cooper, Germantown, Tenn.; William A. Smith, Des Peres, Mo.; Calvin T. Morton, Gleta, Calif.; Joseph C. Hooper, Ellenwood, Ga.; Sharlene Sharpe Love (Mrs. Herschel D.), Aniston; Jack R. McClanahan, Indian-antic, Fla.

1956

Mr. and Mrs. James G. Crouch (Sarah

1958

Harold A. Mathews is consultant and soil scientist with Old Dominion Soil Consultants, Inc., in Richmond, Va....Elliot J. Coleman, Jr., became president of Jordan Contracting Co. on October 1....James Alvin LeCroy received an MBA from Samford University in Birmingham on Aug. 17.

Jon C. Countess is an attorney with Laucks & Monroe in York, Pa....George D. (Mitch) Mitchell became project manager for printed circuit board fabrication for General Electric in Florence, S.C., in October. He and his wife Ester have a daughter, Nene Kathleen, 9 months.

1959

Eugene E. (Gene) Burr has announced the opening of his firm Eugene E. Burr, Architect-Planner at 619½ Gay Street in Knoxville, Tenn., for the prac-

(Continued on page 14)

AUBURN ALUMNALITIES—Continued

tice of architecture, land planning, and community planning....Maj. Hubert Mitchell is an executive officer at the New River Marine Corps AS, Jacksonville, N.C....

Mr. and Mrs. Charles E. Davis (Maxine Reynolds '61) now live in Frankfurt, Germany, where Mr. Davis will be with the Army Corps of Engineers....Mr. and Mrs. George M. Sewell (Myrna Lyle '60) live in Singapore, China....

Mr. and Mrs. Thurman C. Waller, Jr. (Sue Barrett '60) live in Kingsport, Tenn., where he is resident engineer at the Holston Army Ammunition plant for the Army Corps of Engineers....Robert K. Baisley is currently in Eltville, Hessen, Germany. With him are wife Shirlann and sons Christopher and Jeremy.

BORN: A son, Will Lithgow, III, to Mr. and Mrs. Will L. Liddell, Jr., (Mary Carr '66) of Raleigh, N.C., on Oct. 22. Will is an assistant professor in the Department of Engineering Science and Mechanics at North Carolina State....

A son, James Howle, to Mr. and Mrs. Robert C. Tanner (Rosemary Lyle) of Marietta, Ga., on Oct. 8. James joins big sister Lynn, 5½. Bob is a program analyst at Dobbins, AFB, Ga.

1960

James E. Grady received an MBA from Western New England College in Springfield, Mass., in May. He is a salesman for the pigments department of duPont Co. He and his wife and three children—Jimmy, Michael, and Maureen—live in Wilbraham, Mass....

Dr. and Mrs. David Lee Marshall (Betty Joan Wilkerson) now live in Carmel, Ind., where Dr. Marshall is a group leader in the research department of Dow Diagnostics of Dow

Chemical....William A. Baggett '60 is assistant ranger on the Glenwood district of the Jefferson National Forest in Virginia with headquarters at the Natural Bridge Station....

Douglas O. Fegenbush, Sr., is with Eli Lilly in Indianapolis, Ind....William H. Orr, president of Orrox Corp., has been elected to the Board of Directors of the International Tape Association, Inc.

1961

Grant L. Smith is general manager of National Screenprinters in Auburn....Sam Hooper Gammill is a partner in a new firm for the practice of law in Jackson, Miss., with branch offices in Kosciusko, Miss....James Henry Tice is vice president of Standard Co. of New Orleans, a roofing and sheetmetal contractor. He and his wife Judy have four daughters: Susan, Carolyn, Kirstie, and Barbara.

ADOPTED: A two-year-old daughter, Laura Ann, by Mr. and Mrs. Lovic Wesley Ridenhour, Jr., of Wilmington, N.C. She joins sister Susan, 11, and brother Russell, 9. Mr. Ridenhour was recently transferred by duPont to the Cape Fear Plant, in Wilmington.

BORN: A daughter, Jennifer Leigh, to Mr. and Mrs. James U. Price (Willene Edwards Frost) of Spartanburg, S.C., on Oct. 12. She joins Cary, 14, Barry, 12 and Cindy, 8. Jim is plant engineer at Lyman Printing & Finishing Co., a division of M. Lowenstein & Son, Inc....A daughter, Karyn Leigh, to Mr. and Mrs. Norman Sims (Betty Sue Barber) of Smyrna, Ga., on May 14, 1973. She joins Jay Kevin, 9½; and Shannon Kay, 4½. Norman is president and owner of All

South Pictures, Inc., which does film restoration, preservation, cleaning, etc.

1962

Richard B. Countess is with Westinghouse Turbine Division in York, Pa....Donald W. Sutherlin is an aerospace engineer with the Army Missile Command in Huntsville....Dr. Richard L. Guthrie has joined the state staff of the Auburn Cooperative Extension Service as soils specialist. He had been a soil scientist with the Soil Conservation Service in Lincoln, Neb. He and his wife Kay Couvrette have two daughters: Kathy, 10, and Ann, 7....

Dr. Robert B. Helms is a senior staff member of the American Enterprise Institute for Public Policy Research in Washington, D.C. He has recently written a comprehensive publication for the National Energy Project called "Natural Gas Regulation."

Charles F. Davis, III, is now with Skidmore Owings & Merrill in Chicago, Ill.

1963

Jackie O. McLeod is with the Chicago-Northern Illinois general agency of National Life Insurance Co. of Vermont. She has been in life insurance since 1967 and has won several company awards including the honor of being the first woman to sell a million dollars worth of insurance in Kentucky where she was before joining the Chicago Agency....Gayden G. White, Jr., now lives in Richardson, Tex., a suburb of Dallas where he has been transferred by Union Carbide....

Dr. Katherine Hines Mahan recently returned to Columbus, Ga., after a three-month stay in India. She studied at Osmania University in Hyderabad, India, and toured 14 cities on the trip sponsored by the U.S. Office of Education and the government of India. Dr. Mahan is currently producing a film strip from slides and pictures she took and music she recorded....

Maj. Jack N. Parrish has received an M.S. in guidance and counseling from Troy State. He is currently assigned to Langley, AFB, Va., as an airlift staff operations officer....Col. Gerald W. Zinkan is a member of the team that assisted in the development of the new B-1 strategic bomber. He is in charge of the Air Force Plant Representative Office at the GE plant in Cincinnati. He and his wife Lee have two children, Lynn and Larry.

BORN: A daughter, Patricia Michelle, to Mr. and Mrs. Francis M. Sando of Auburn on July 22. She joins big brother Michael Scott, 4.

1964

James W. (Jim) Morris has completed his doctoral course work at the University of Alabama and is currently principal of an elementary bi-national school in San Salvador, El Salvador, C.A. His wife Michele Martin '69, resigned as Editor of the University *Alumni News* to accompany him to San Salvador where she teaches English at a bi-national secondary school in which 20 percent of the students are American. This is the second trip to Central America for Jim and Michele who were in Columbia in 1973 for six months while Jim did an internship as director of a bi-national school and

Michele taught English....

Margaret Elizabeth Morris Keltner received an M.A. in guidance and counseling in May from Hampton Institute. She and her four children live in Newport News, Va....Ltc. Frederick K. Smallwood is back in the states after a six-month deployment to the Mediterranean aboard the USS Inchon....

N. Rob Martin recently received his Ph.D. at the University of Illinois. He and his wife Betty and children Alison, 12; Angela, 11; and Steven, 8, now live in Athens, Ga., where he works with the USDA, stationed at the University of Georgia....

Bobby Neal Crowe was promoted to major on Aug. 1. He is currently stationed at Ft. Lee in Petersburg, Va., as a full-time graduate student in Logistics Management....Capt. William T. Lyon recently graduated from the National Search and Rescue School at the Coast Guard Training Center, Governors Island, N.Y.C.

Elmo E. Shropshire combines two professions—that of a six-day-a-week veterinarian and a night-time bluegrass showman at Reno gambling joints and San Francisco night spots. He is owner and director of the Arguello Pet Hospital in San Francisco and he and his wife Patsy comprise The Homestead Act of toe-tapping bluegrass music. The two were recently featured in *Diversions* magazine.

BORN: A daughter, Anne Rannoch, to Mr. and Mrs. James H. Phillips (Marianne Hixon '67) on Sept. 10. She joins brothers Jayson, 5, and Todd, 2. Jim has recently been named manager of marketing, recruiting, and placement for Dow Chemical USA in Midland, Mich.

Frank Moon, Katherine Jackson Marshall, William E. Friel, Charles N. Kearley, Fred Birdsong, John M. McKay, Leslie Woodall, L.R. Tabor, Lon E. Williamson, Nelson M. Snow, Jr., Oliver C. Wiley, Tom L. Nash, Jr., K.G. Taylor. Third Row: Colburn E. Hooton, John Allen Jones, Mildred Garlington Richburg, James G. Phillips, Louise McCain Phillips, Warren McMahan, Gilbert O. Maulsby, John S. Dering, James A. Benford, William W. Beck, Lynwood H. Poole. Fourth Row: Lawrence C. Lewis, Ezra B. Perry, Philip G. Hughes, Hugh L. Cottle, J. Morgan Jackson, William L. Gaines, Jr., Joseph A. Kyser, Sam Norris, Robert N. Hoit, C.E. Killebrew, Loyd G. Richey. Fifth Row: L. Curtis Hester, William H. Worley, Hershel C. West, Bob Hamilton, B.W. Appleton, Sarah Stanley Appleton, James L. Peacock, William H. Morrison, Wade H. Bowie, J. Frank Moore, Jr., Julius D. Capps.

In Memoriam — '14 Through '62

Wilmore Pearson Cox '14 of Birmingham died Nov. 6. He retired from McWane Cast Iron Pipe Co. as vice president and manager of sales in 1959, after 37 years of service. Survivors include his wife, Mrs. Elizabeth Lewis Cox; a daughter, Mrs. James Whitfield Waitzman; four sons, Wilmore Pearson Cox, Jr., James Leonard Cox, Thomas Cox, and Richard Lewis Cox, all of Birmingham; a sister and two brothers.

Frank Euell Boyd '14 of Auburn died Dec. 7. He was a former president of the Auburn University National Alumni Association and 1961 *Progressive Farmer* magazine "Man of the Year for Agriculture." In 1962 he was presented the Algernon Sydney Sullivan Award at Auburn for his humanitarian service. Mr. Boyd lived most of his life in Montgomery where he was an agronomist with the Virginia-Carolina Chemical Co. Survivors include his wife, Elta Majors Boyd '26; one son, Frank E. Boyd, Jr., '48 of Birmingham; a daughter, Marie Patterson Boyd Carnal of St. Louis, Mo.; three grandchildren, two brothers, and two sisters.

McClellan Ratchford '14 of Atlanta died Nov. 28. Survivors include his wife and son, McClellan Ratchford, Jr., '58.

Charles F. Moreland '15 of Richardson, Tex., died September 14, 1973, according to information received in the Alumni office.

Robert Floyd Donehoo '19 of Oneonta died Nov. 5 following an extended illness. His business career included work with the Extension Service in Jackson and Cullman Counties and with the Allis Chalmers farm equipment agency in Oneonta. Survivors include his wife, Mrs. Derae Donehoo; two sons, Robert Floyd Donehoo, Jr., '58 of Clearwater, Fla., and John Clinton Donehoo '63 of Thousand Oaks, Calif.; one brother, Clyde Augustus Donehoo '15 of Gadsden; and a sister.

W. Marvin Taylor '19 of Montgomery died April 4, 1973. Survivors include his wife.

William Lee Smith, DVM, '20 of Leeds died Nov. 19 at his home. He is survived by his wife, Mrs. Hermie Smith, and one brother Walter G. Smith of Shawnee, Okla.

Maine Eyric Nettles '21 of Baton Rouge, La., died Nov. 9 according to information received in the Alumni Office.

Sam W. Esslinger '21 of Florence died Feb. 16. He was a former U.S. District Commissioner and a former member of the Alabama Pardon and Parole Board. Survivors include his wife, Mrs. Oline Grissom Esslinger; two sons, Sam Esslinger, Jr., of Florence and Thomas H. Esslinger of West Palm Beach, Fla.; a brother, and three sisters.

Henry Malcolm James '23 of Waverly died in 1971 according to information recently received in the Alumni Office.

Milton Massey Collins '24 of Birmingham died Nov. 21. He is survived by his wife, Mrs. Martha Collins; one son, Robert Milton Collins of Birmingham; one daughter, Mrs. John Durr of Montgomery; one brother, Meredith Collins of Roanoke, Va.; and one stepson and seven grandchildren.

Samuel Parker Harrell '26 of Butler died in University Hospital in Birmingham on Oct. 28 after a short illness. He retired in 1972 as County Executive Director with the Alabama Soil Conservation Service. Mr. Harrell had earlier worked with the Federal Horticultural Board in Texas and Mexico, and with the Federal Land Bank. He also operated a cattle farm in Melvin. Survivors include his wife, Beverly Williams Harrell; two daughters, Mrs. Joseph Hornady of Monroeville, Miss., and Martha E. Harrell of Meridian, Miss.; and one son, Dr. Alfred Gaines Harrell, III, '73 of Meridian, Miss.; and three grandsons. Mr. Harrell also leaves three sisters and two brothers, including Alfred Gaines Harrell, Jr., '31 of Marion.

Dudley Nall Traywick '27 of Montgomery died Dec. 9 after a brief illness. Survivors include his wife, Mrs. Mabel H. Traywick; two daughters, Mrs. Jeanette Nall Haywood of Montgomery and Mrs. Marion Dudley Rashall of Selsbee, Tex.; one brother, Col. Jessie T. Traywick '22 of San Antonio, Tex.; and five grandchildren.

John M. Garrett, Jr., '27 of Elba died Dec. 1. Survivors include his sister, Jeannette Garrett of Elba.

Thomas Rodgers Slaughter '27 of Newport News, Va., died May 21, 1973. Survivors include his wife, Mrs. Thomas R. Slaughter.

Dr. Charles Dunklin Bradley '29 of Maitland, Fla., died Nov. 4. He was the founder and president of Bradley Semiconductor Corp. of New Haven, Conn. Dr. Bradley was also instrumental in the starting of the Eli Whitney Technical School in Hamden, Conn. Survivors include his wife, Mrs. Susan O. Bradley; one son, Charles H.D. Bradley, II, of New Haven, Conn.; one daughter, Mrs. John Lambert Marvin of Wellesley Hills, Mass.; and four grandchildren.

Elsworth Spinks '29 of Birmingham died Nov. 2 at his home. Survivors include one daughter, Mrs. Anne Ruth of Vacaville, Calif.; three grandchildren; and four sisters.

Marcel Emile Crettett, Sr., '32 of San Antonio, Tex., died June 6 according to information received in the Alumni Office.

Elizabeth Jackson Stewart '35 of Talladega died in Oct. 1973. Survivors include her husband, Jack C. Stewart '35 of Talladega.

Virginia Albert Haggard '36 of Auburn died Dec. 3. She received her master's degree from Auburn and taught mathematics at Auburn High School and at the junior high level from 1945 to 1968. She taught at Lee Academy for four more years before retiring after nearly 50 years in the teaching profession. Survivors include one son, Richard A. Haggard '53 of Montgomery; one daughter, Mahla Virginia Haggard Ivey '51 of Oklahoma City, Okla.; and five grandchildren.

Cholston Thomas '36 of Pensacola died Nov. 20 after a lengthy illness. Mr. Thomas worked at the Auburn National Bank during the 1940's before moving to Pensacola. Survivors include his wife, Nell Lowe Thomas '35, and one daughter, Mrs. Dan Forster of Atlanta.

James Moore Wallis '37 of Talladega died Dec. 5. Mr. Wallis was president and owner of Jim Wallis Lumber Co. in Talladega. Survivors include his wife, Mrs. Marjorie B. Wallis; four daughters, Mrs. Charlotte Chamberlain of New Orleans; Miss Marjorie Wallis of Boston; Miss Helen Wallis of Norwich, Conn.; and Miss Mary Wallis of Tallahassee; a sister, Mrs. Bryce Robinson of Birmingham; and a brother, Ralph Wallis '42 of Talladega.

Charles Gathen Glasscock '38 of Birmingham died Nov. 5 at his home. He is survived by his wife, Mrs. Frances Kirkland Glasscock; one daughter, Mrs. Wallace Kilgo, Jr., of Birmingham; his mother, Mrs. Maud Glasscock of Montevallo; two sisters, and two brothers.

Thad Averette Kelley '38 of Mobile died at a Mobile hospital Nov. 24. Mr. Kelley, a native of Abbeville, had been a resident of Mobile for the last 16 years. Survivors include his wife, Mrs. Marilyn C. Kelley; three sons, Jeff Kelley of Fort Payne; Joe Kelley '70 of Mobile; and Joel Kelley of Auburn; one brother, and one sister.

Charles Everett Smith '39 of Dadeville died August 17 of a heart attack. He was representative of Liberty National Life Insurance Co. for 27 years and a former county supervisor for the Federal Housing Administration of the U.S. Department of Agriculture. Mr. Smith also played on Auburn's '36-'39 football teams. Survivors include his wife, Eloise M. Smith; one son, Charles E. Smith, Jr., '63; one daughter, Marian S. Blake; and three grandchildren.

Eben Henry (Little Red) Hines '39 of Crystal River, Fla., died Nov. 13 after a four-year bout with cancer. He retired as an executive vice president of Burlington Industries in 1970 when the first of three operations was performed. Survivors include his mother, Mrs. E.H. Hines, Sr., of Southern Pines, N.C.; two

daughters, and one brother, Col. J.P. Hines '36 USAF.

Andrew Dennis Cox '39 of Red Bank, N.J., died Dec. 2. He was a native of Birmingham and had lived in New Jersey for 12 years. Mr. Cox was a retired engineer for Ingersoll-Rand Co., New York, N.Y., and operated a camera store in Red Bank. Survivors include his wife, Mrs. Barbara Hall Cox; three daughters, one brother, and two grandchildren.

Henry Asa Vaughan '40 of Tuskegee died Nov. 27 in a Macon County Hospital. Survivors include his wife, Mrs. Jean Hampton Vaughan; his mother, Mrs. Mary Howard Vaughan of Tuskegee; one daughter, Mrs. Charlotte V. Jinks of Tuskegee; two sons, Henry Asa Vaughan, III, of Hurtsboro; Roland Hampton Vaughan of Reston, Va.; two brothers, Dr. Robert H. Vaughan of Columbus, Ga.; and Dr. John Thomas Vaughan '55 of Auburn.

Reaia Chatfield Yeatman '41 of Montgomery is deceased according to information received recently in the Alumni Office.

John Elliot Thames '49 of Montgomery died Nov. 12 in Jackson Hospital. He was a native of Charleston, S.C., and a resident of Montgomery since 1944. Survivors include his wife, Mrs. Betty Jean Popwell Thames; three daughters, Mrs. Teresa Crabtree of Atlanta; Mrs. Joy Peavy of Montgomery; Miss Kathi Thames of Montgomery; two sons, John Elliot Thames, III, and Walter Tipton Thames both of Montgomery; his mother, Annie Hamilton Thames of Montgomery; three brothers, Lee H. Thames '58 of Jacksonville, Fla.; Ed Thames of Montgomery; William R. Thames of Richmond, N.Y.; and three grandchildren.

Joseph M. Tiburzi '52 of Chester, Pa., died Nov. 29 after being shot five times in his office in Puerto Rico by a former employee. Mr. Tiburzi was serving as Caribbean general manager of Firestone Inter-America Co. He came to Auburn on an athletic scholarship and was instrumental in the success of the 1948 freshman team. He later went on to be named an All-Southeastern Conference tackle. Mr. Tiburzi is survived by his father, Joseph Tiburzi of Concord, Pa.; one son, Christopher J. Tiburzi, one brother, Angelo Tiburzi of Concord, Pa.; and a sister, Mrs. Jean T. Evans of Aston, Pa.

George Neal Thomas '53 of Columbus, Ga., died Jan. 21, 1974 according to information received in the Alumni Office.

Alton Marvin Wright '57 of Greensboro, N.C., is deceased. Mr. Wright was a native of Selma and had been a resident of Greensboro, N.C., for eight years. He was a general contractor and president of Marvin Wright and Company, Inc. He is survived by

his wife, Judy Fuquay Wright '65 and his daughters, Ceci, 13, and Melissa, 8.

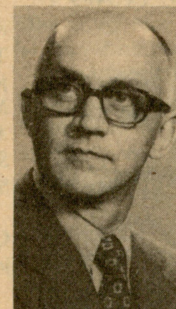

Bobby Lauder '60 of Hurtsboro died Nov. 22 in an automobile accident in Barbour County. He was a running back for the Tigers during the late 1950's. Survivors include his parents, Neal Anderson Lauder and Katie Callaway Lauder of Orange Beach; his wife, Peggy Jo Forehand Lauder; two sons, Robert Neal Lauder, Jr., and David Brooks Lauder; two brothers, James Amel Lauder of Gulf Shores, and David Thurston Lauder of Mobile.

William Donald Waddle '60 of Houston, Tex., died March 3, 1972. He is survived by his wife, Mrs. William D. Waddle of Houston, Tex.

Edwin Jewett Davis '62 of New Orleans died Nov. 27 following an extended illness. Survivors include his wife, Mrs. Sheila Davis; his mother and father, Mr. and Mrs. L.J. Davis of Elmore; two daughters, Kimberly Maureen Davis and Melinda Jane Davis; and one sister, Mrs. Jessie Strock of Elmore.

Stephen Frederick Syer '62 of Talladega died Dec. 2 in a Birmingham hospital. Mr. Syer had been a physics and chemistry teacher at Talladega High School for the past ten years. He was chosen one of the "Outstanding Young Men of America" in 1974 and was named an outstanding science teacher of 1971. Survivors include his wife, Mrs. Marion B. Syer; one son, Patrick; two daughters, Stephenie and Susan, all of Talladega; his parents, Mr. and Mrs. Charles S. Syer of Huntsville; one brother, Ronald M. Syer of Camden, S.C.
